Understanding the 2020 Census

For the first time in the history of the Decennial Census, residents could choose to respond to the census online, by phone, or by the traditional paper census questionnaire, making the 2020 Census the easiest and most accessible Decennial Census.

The COVID-19 pandemic virus and legal challenges relating to the 2020 Census were responsible for the U.S. Census Bureau adjusting the date for responding to the 2020 Census on several occasions which delayed release of the data initially scheduled for late 2020.

April 1 was the reference point established by the U.S. Census Bureau for residents to respond to the Decennial Census. On October 13, 2020, the U.S. Supreme Court issued an order requiring the 2020 Census self-response and field data collection operations (i.e., the population count) to end on October 16, 2020, irrespective of any other previously adjusted date.

Population counts are needed to determine representation in the U.S. House of Representatives, in establishing state and local legislative districts, and will play a significant role in determining allocation of federal funding for state and local governments.

Release of Additional 2020 Census Data

The U.S. Census Bureau began releasing 2020 Census population data in August 2021. Other 2020 Census characteristics such as age, sex, housing, income, etc., will be forthcoming. Available data from the 2020 Census are available at the links below.
