SDE Feature Class

Tags

church, churches, religious institutions

Summary

The Churches feature class may be used internally for general mapping or emergency response purposes.

Description

This feature class identifies churches located in Seminole County. Churches were identified using Department of Revenue (DOR) codes made available by the Seminole County Property Appraiser's Office (PAO). Some church locations were manually added if they were not picked up by the DOR code search. Tabular data were populated with information taken directly from the PAO parcel data. Please note, this layer includes both churches and some associated parcels under church ownership. The data are updated annually prior to the onset of hurricane season (June 1). The most recent update occurred in April 2015.
