daycare, child care, family day care home

Summary

The Daycares feature class is used for location analysis, internal planning, and mapping.

Description

This feature class provides locational data for child care and family day care facilities within incorporated and unincorporated Seminole County. It is updated annually as part of the data audit conducted for select layers prior to the onset of hurricane season (June 1). Data is compiled from lists of exempt and non-exempt facilities provided by a representative of the Florida Department of Children and Families (FDCF). The most recent update occurred in April 2019.

Please note, the FDCF also included some school locations in their exempt list. School locations are maintained in a separate SDE layer. SchoolLocations, and there is a field to indicate which schools also serve as daycares in some capacity.
