

FINAL PUBLIC NOTICE

The Federal Emergency Management Agency (FEMA) has received the subgrant application for Seminole County's Curryville Road's culvert repair due to damages in Hurricane Irma (DR-4337-FL PW 04843). Pursuant to Executive Order 11988 and 44 CFR Part 9.12, final notice is hereby given of FEMA's intent to provide funding for this project under the Public Assistance (PA) Program.

An initial disaster-wide Public Notice was published October 6, 2017 for Hurricane Irma. Comments and other information received were fully evaluated by FEMA along with evaluation of social, economic, environmental, and safety considerations. This notice serves as a project-specific final notice for FEMA's funding action located within the floodplain. FEMA has determined that the only practicable alternative is to locate this facility at its original location within the floodplain because the facility is functionally dependent upon its location within the floodplain.

Funding for the proposed project will be conditional upon compliance with all applicable federal, tribal, state and local laws, regulations, floodplain standards, permit requirements and conditions. This action complies with the National Flood Insurance Program (NFIP) requirements.

Responsible Entity: FEMA Public Assistance (PA) Program

Applicant: Seminole County

Project Title(s): PA-04-FL-4337-PW-04843; 28520 - Curryville Road

Location of Proposed Work: (28.623792,-81.067379)

Floodplain: Project is located in the A zone, area of 100-yr flooding, per Seminole County FIRM Panel #12095C0305 F, dated 09/25/2009.

Proposed Work and Purpose: Seminole County will repair a concrete arch culvert located on Curryville road. Repairs include a hazard mitigation proposal (HMP) to replace the single precast concrete span arch culvert, 40 FT x 16 FT x 5 FT, with a double barrel precast concrete culvert system, 40 FT x 16 FT x 6.75 FT, while also adding 370 TN of rip-rap for bank and erosion control, reinforced steel roadway, applying 168 TN of superpave asphaltic concrete, and installing 262 LF of a double rail guardrail system. The applicant has a Hydrologic and Hydraulic Study (H&H) pertaining to the repairs. The applicant will be responsible for obtaining any necessary USACE and FDEP permits for the work and confirming compliance with permit conditions.

Project Alternatives: The alternative that has been considered is the no action alternative. This alternative is not feasible as the area will remain vulnerable to flood risk, including property damage and hazards to human life and safety. With the no action alternative, continued negative impacts on adjacent infrastructure, property, residents, and the community may be experienced. Alternate locations were not considered as the culvert is functionally dependent upon its location within the floodplain.

Comments: This will serve as the final public notice regarding the above-described action funded by the FEMA PA program. Interested persons may submit comments, questions, or request a map of this specific project by writing to the Federal Emergency Management Agency, Region 4, 3003 Chamblee-Tucker Road, Atlanta, Georgia 30341, calling 770-220-5432, or by emailing FEMA-R4EHP@fema.dhs.gov. Comments should be sent in writing with the subject line FL-4337-PW-04843, Seminole County at the above address within 15 days of the date of this notice.
