Summary

The HealthCareFacilities feature class provides base information for internal planning and analytical purposes.

Description

This feature class contains a subset of the health care facility information provided by the Florida Department of Health (DOH). The DOH provides statewide health care facility locations and information, and only facilities located within Seminole County and a 5-mile buffer of the County boundary are included in this feature class. Facilities represented include, but are not limited to, hospitals, surgical centers, assisted living facilities, and adult family care homes. Attribute information includes the name, physical address, telephone number, and capacity of these facilities. Seminole County Public Safety also maintains a current list of health care facilities within the County, and this tabular list was reviewed in 2015 to ensure no facilities were omitted. The most recent updates to this layer occurred in May 2013 and April 2015. This data is meant to be used for planning purposes only and is not intended to represent a complete inventory of health care facilities in Florida.

Please note, Seminole County GIS updates this layer annually. The DOH updates health care facility GIS information monthly. Please visit the [DOH Interactive Viewer](#) or [ArcGIS Online map](#) for the most current information available.
