Web Site Navigation Menu

eProcurement Notification E-mail System

Welcome to Seminole County Government's eProcurement Notification E-mail System. Completion of this electronic form will place your firm on the automated bid information notification system. This registration and notification service is free to all vendors.

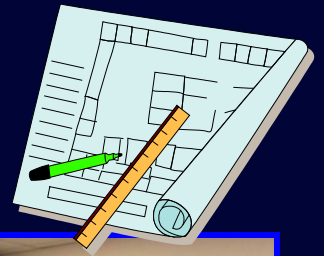

As an overview of the online eProcurement Notification system, the first step requires basic information about your firm. Please verify all information to ensure that it is correct. The second step would be to select the listing of categories of goods and services, called *commodity classes*, that your business can provide. You **MUST** select the "*broad*" *commodity class category listing* even though you may only provide goods and services for one of the commodity class subcategory items.
