schools, public schools, private schools, vaccinations, vaccine, points of distribution, PODs, emergency response

Summary

The PointsOfDistributionVaccination feature class is used internally for mapping and planning activities.

Description

Vaccination Points of Distribution (PODs) are sites designated by the Florida Department of Health (DOH) that may be used for mass-distribution of vaccines during an emergency response event. Some supplemental attribute data (i.e. phone and fax numbers, school numbers) were derived from information available online or provided by the school board. PODs data are updated annually prior to the onset of hurricane season (June 1).
