PURPOSE OF THE CAPITAL IMPROVEMENTS PROGRAM

This document provides the residents of Seminole County with the Seminole County Board of County Commissioners’ (BCC) Capital Improvement Program (CIP) for a five-year period through the fiscal year ending September 30, 2017. This document also provides explanatory material on all capital projects contained within the CIP as well as active capital projects budgeted within FY 2011/12 which will have available balances carried forward into FY 2012/13.

The Capital Improvements Program (CIP) provides a planned and programmed approach to utilizing the County’s financial resources in the most responsive and efficient manner to meet its service and facility needs. The CIP serves as a “blueprint” for the future of the community. It is a dynamic tool, not a static accounting document. Development of the CIP requires integration of financial, engineering and planning functions. Additionally, it incorporates needs identified in the Capital Improvements Element (CIE) required under the Growth Management Act of 1985. The CIE focuses on anticipated infrastructure requirements for six facility types required by the State of Florida, Parks, Solid Waste, Stormwater, Transportation, Water, and Wastewater. The CIE focuses on service level standards and the land use plan adopted by the Board of County Commissioners in order to preclude deficiencies in adopted level of services. The CIP is developed to achieve the following results:

- Establishing a system of procedures and priorities by which each proposal can be evaluated in terms of public need, adherence to the land use plan, the inter-relationships of projects, and cost requirements;
- Assuring that the five-year schedule of capital improvements is financially feasible.
- Scheduling capital projects over an extended period so the most efficient financial and management planning for the CIP can be achieved;
- Consolidating and coordinating departmental requests to facilitate consistent and transparent updates to the BCC for optimal decision-making;

PURPOSE OF THE CAPITAL IMPROVEMENTS PROGRAM

- Successfully implement level of service standards for public facilities as outlined in Florida Statutes Chapter 163, part of which states:

Provide that public facilities and services meet or exceed the standards established in the Capital Improvements Element required by F.S. 163.3177 and are available when needed for the development, or that development orders and permits are conditioned on the availability of these public facilities and services necessary to serve the proposed development. Not later than one year after its due date established by the State Land Planning Agency's rule for submission of local comprehensive plans pursuant to F.S. 163.3167(2), a local government shall not issue a development order or permit which results in a reduction in the level of services for the effected public facilities below the level of services provided in the comprehensive plan of the local government.

The CIP establishes the proper interface with the CIE as required by the County's Comprehensive Plan, adopted on September 11, 1991, which states:

*The County shall formalize a process for the update and refinement of multi-year projections of fiscal resources such that a financially feasible schedule of capital improvements is maintained (9J-5.016(3)(b)(*3) and (5).*

Established levels of service can be found in the *Purpose of the Capital Improvement Elements* section of this book, which follows.

The Capital Improvement Program provides for the acquisition, construction, reconstruction, initial fixtures and equipment, renovation, rehabilitation, or replacement of facilities and any related costs for land acquisition, land improvements, design, feasibility studies, engineering studies and engineering. It includes projects which are, or will become, the property of Seminole County, as well as projects that although not owned by the County, will be part of a joint project agreement with other governmental entities. Generally, a capital project is planned and executed in phases as follows:

PROJECT DEVELOPMENT: These are costs incurred by the County to identify project requirements, and to define a project's work scope including preliminary design studies, permitting requirements, data collection, public involvement, legal and technical documentation, cost estimates, environmental impacts, and assessment of alternatives.

DESIGN: These are costs incurred by the County to design a project in accordance with the scope of work set forth in the development phase. This includes professional consultant fees, legal and technical documentation, constructability review, data collection, advertising, assessment of alternatives related to project design, construction management services and bid reviews.

PURPOSE OF THE CAPITAL IMPROVEMENTS PROGRAM

LAND: Costs incurred by the County for the purchase of land, easements and right-of-way. This also includes purchase price, surveys, appraisals, environmental audit, permitting, legal costs, maps, charts, aerial photography, and other associated costs.

CONSTRUCTION: This includes costs incurred by the County for all construction related tasks required to place a project in service. This includes project construction contracts, professional and technical assistance, county engineering costs, legal and technical documentation costs, inspection, testing and permitting.

PROFESSIONAL SERVICES/OPERATING: Non-recurring, non-capitalizable costs incurred by the County for services related to a capital project, such as required environmental monitoring costs and other such costs. These costs are generally incurred after the constructed asset is capitalized.

CAPITAL IMPROVEMENTS IMPACT

The capital improvements program includes expenditures for projects that add to the capital assets or infrastructure of Seminole County. The planning, permitting, design and construction of these projects often carry over from one fiscal year to the next. The capital improvements budget usually shows large fluctuations from year to year due to the timing of the completion of numerous individual projects. Revenues for capital projects come from diverse sources, including long-term bonds, impact fees, taxes and grants.

**OPERATING AND CAPITAL BUDGETS –
HOW ARE THEY RELATED?**

The operating and capital budgets of Seminole County are intimately related to each other. Many capital projects, especially those involving new infrastructure, result in increased operating costs. The costs of operating and maintaining new infrastructure are always considered in the operating budget. It is Seminole County’s philosophy that new projects are only undertaken if current and future operating revenues are sufficient to fund the operating costs associated with new capital projects.

As a general rule, capital projects are budgeted separately from the operating budgets in various projects or funds. Exceptions to this are enterprise funds, such as those that fund the Environmental Services Department. These departments budget capital projects within their funds in accordance with generally accepted accounting principles for enterprise funds. Other capital projects are funded through long-term debt, specially designated ad-valorem taxes, and interfund transfers to capital projects funds.

CAPITAL IMPROVEMENTS PROJECT FREQUENTLY ASKED QUESTIONS

- 1. What is a Capital Improvements Project (CIP)?**
Any governmental expenditure for the construction, installation and/or renovation of facilities. Capital projects are relatively large scale, non-recurring projects that may require multi-year financing. Expenditures that meet this criteria are included in Seminole County's Capital Improvements Program.
- 2. What type of costs are included in a CIP?**
All design and construction costs and any other costs associated with preparing a facility for use should be included in the project.
- 3. What is an encumbrance?**
The commitment of funds to purchase an item or service. An encumbrance is generated when a purchase order or release order is issued.
- 4. What happens if a department is not able to expend/encumber funds by year-end that were approved in the budget for that fiscal year?**
If a department budgets a certain amount of money for a project within a fiscal year, but the project is not completed and the funds are not expended, the unexpended budget is carried forward to be expended in the next fiscal year.
- 5. How much money/funds are available for projects?**
Funding availability is determined annually and is based on agency priorities and anticipated revenue/financing plans.
- 6. What is the process for amending a CIP budget?**
Changes to a CIP project, which affects the total cost or current budget, requires a budget amendment and either County Manager or BCC approval.
- 7. What is a carry-forward project?**
Any project that spans multiple years and has unspent budget from a previous year that is carried forward to be expended in the next fiscal year.
- 8. How are operating expenditures associated with a CIP handled?**
When a new CIP is requested, all costs, including future operating impacts are considered. Once the project is completed and operational, the operating and maintenance costs should be funded with operating revenues.
- 9. If a project won't begin for three years, would it be included in the Five-Year CIP?**
Yes, all projects that will need some funding within the next five years should be submitted. If projects/costs are known beyond the five-year period, they should also be submitted as future cost needs. These can be included in long-term funding need estimates.
- 10. What do the historical costs & budget represent?**
The historical costs on the summary schedule represent the historical costs and budget of only these projects included in the Five Year CIP Program.

PURPOSE OF THE CAPITAL IMPROVEMENTS ELEMENT

The purpose of the annual update to the Capital Improvements Elements Plan (CIE) is to adopt a five year, financially feasible schedule of capital improvements for each facility element. These improvements address the maintenance of adopted level of Service Standards and the achievement of adopted element policies and program goals. The CIE is updated annually as required by state law, and included as part of the annual Text Amendments to the Seminole County Comprehensive Plan which are adopted separately by the Board of County Commissioners. In preparing the document, staff evaluates program and project costs, reviews revenue sources and projections to ensure adequacy to cover the five year period and reviews facility services to ensure maintenance of the adopted Level of Service standards.

Seminole County’s Comprehensive Plan is comprised of the facility elements specified in Rule 9J-5, Florida Administrative Code. The elements are designed to ensure that the County’s growth management plan is supported by adequate services and infrastructure in a timely fashion. The CIE provides an assurance of effective facility elements implementation by adopting a financially feasible five-year schedule of improvements for each type of facility, and by measuring whether those improvements are adequate to meet current and projected demands covering the 5-year period.

The Capital Improvement Program is organized by CIE Facility Element. However, not all projects included in the Capital Improvement Program are CIE projects. Non-CIE projects are generally included in the Capital Improvement Program in the related CIE Facility Element. For a complete listing of CIE projects, please refer to the Seminole County Comprehensive Plan, as amended.

DEFINITIONS OF CIE FACILITY ELEMENTS

Recreation and Open Space Element - Provides goal, objectives and policies within the County’s Comprehensive Plan to insure a variety of adequate recreational facilities within the County. The adopted level of service is 3.6 acres of recreational land per 1,000 population of which 1.8 acres is to be developed (such as a ball field), the remainder being left in a more natural state (such as trails).

Transportation Element - Provides goal, objectives and policies within the County’s Comprehensive Plan to address the County’s transportation needs in terms of safety, capacity, and variety – car, bus, rail, bike and pedestrian. The adopted levels of service vary by the type of road and can be found in the Transportation Element of the Comprehensive Plan.

Drainage Element – Provides goal, objectives and policies within the County’s Comprehensive Plan to address adequate drainage, flood control and water quality within the County.

Mass Transit – Provides goal, objectives and policies within the County’s Comprehensive Plan to address mass transportation. Currently the County is committed to supporting the State in funding mass transit.

PURPOSE OF THE CAPITAL IMPROVEMENTS ELEMENT

Potable Water Element - Provides goal, objectives and policies within the County’s Comprehensive Plan to address the provision of clean water to County customers and the protection of water sources from contamination. The adopted level of service is 350 gallons per day per residential unit.

Sanitary Sewer Element - Provides goal, objectives and policies within the County’s Comprehensive Plan to insure proper treatment and disposal of wastewater. The adopted level of service is 300 gallons per day per residential unit.

Solid Waste Element - Provides goal, objectives and policies within the County’s Comprehensive Plan to address the proper pickup and disposal of solid waste products in the County. The adopted level of landfill disposal is 4.2 lbs per day per dwelling unit and 4.7 lbs per employee.

General Government – Projects which do not naturally fall into one of the CIE Facility Elements are included in the Capital Improvement Program as a General Government project.

HOW TO READ THIS DOCUMENT

The Capital Improvement Program document consists of many sections. The first several sections of the document are a presentation of the Five Year Capital Improvement Program for FY 2012/13 through FY 2016/17. The projects are listed by Element, by Department, and by Fund, with the programmed expenditures reported by each of the five fiscal years.

Following the listings of the Five Year Capital Improvement Program are four additional project listings. The first listing (Proposed Projects) is a listing of projects which have not been previously presented and approved by the Board of County Commissioners. Projects included as part of the FY 2011/12 Amended Budget, the FY 2012/13 Adopted Budget, or previously Adopted Five Year Capital Improvement Programs are excluded from the list of Proposed Projects. The second listing (Unfunded Projects) is a listing of projects which are scheduled but not fully funded during the five years of the Five Year Capital Improvement Program. The third project listing (Changes in Total Anticipated Project Costs) is a listing of projects which were included in the previously adopted Five Year Capital Improvement Program, changes in their cost estimate and their current status. This report connects the previously approved CIP to the current CIP.

A new report for FY 2012/13 is the Future Funding report. Many of the projects in the Five Year Capital Improvement Program include funding requirements after FY 2016/17. These projects are either partially funded prior to FY 2017/18, or were included in a previously Adopted Five Year Capital Improvement Program and subsequently rescheduled. This report lists only those projects with funding requirements after FY 2016/17, and breaks down their costs into costs prior to the five year CIP window, costs during the five year CIP window, and anticipated costs after the five year CIP window.

The remainder of the book consists of detailed information for each of the Elements. Each section contains a listing of all the projects within the Element (an extract of the full project list by Element report) and individual project detail sheets. The project detail sheets include all projects contained within the Five Year Capital Improvement Program (including the Proposed Projects), Unfunded Projects, On Hold projects, and projects which were included as part of the amended FY 2011/12 Budget and whose available funds will be carried forward into FY 2012/13 as part of the Carryforward process. Projects which are in Closeout as of the end of FY 2011/12 are not included in the Five Year Capital Improvement Program.

The top of the project detail sheet consists of the following information:

Seminole County Government		
Transportation		
Project Title: State Road 417 at US 17/92 Fencing Interchange Project	Project Status: On Hold	Start Date: April 2012
Project #: 00282501	District (s): Countywide	End Date: June 2013
<u>Project Location</u>	Family: No Family	

The first line consists of the Element that the project is contained within.

The second line consists of the name of the project, the current status of the project, and the date the project is anticipated to begin. The status of the project can be any of the following:

- Proposed – a project which has not been approved by the Board of County Commissioners prior to approval of the Five Year Capital Improvement Plan.
- Approved – a project which has previously been approved by the Board of County Commissioners in a previously issued Five Year Capital Improvement Plan.
- Adopted – a project which is included in the Amended Budget.
- Active – a project which has encumbered or expended funds.
- On Hold – a project which is not currently being worked on.

The third line consists of the project number, the district in which the project is physically located, and the anticipated completion date for the project.

The box on the right of the fourth line identifies the family, if any, that the project is a member of. In accordance with the Budget Policy of Seminole County, funds may be moved between family members by the County Manager without requiring approval of the Board of County Commissioners. The Board of County Commissioners is regularly informed of such movements.

Changes in Total Anticipated Project Costs**

Number	Prior Year Department	Project	Total Anticipated Cost		Change	Notes
			Previous	Current		

Previous Total Anticipated Cost reflects the total anticipated project cost for all projects included in the Adopted FY 2011/12-2015/16 Capital Improvement Program. Current Total Anticipated Cost reflects the total anticipated project costs for the same projects in the 2012/13-2016/17 Capital Improvement Program. If the previously reported project does not appear in the CIP Program, an explanation is given rather than the change being calculated.

The report excludes all projects initiated after the adoption of the Capital Improvement Program for FY 2011/12-2015/16.

Total anticipated project costs can increase from year to year due to the allocation of engineering costs and consulting costs which were originally budgeted and expended either as operating expenditures or as separately budgeted general engineering consultant projects. The remaining changes in total anticipated project costs are primarily due to changes in budgeted and anticipated costs or the effects of rounding of actual expenditures.

C.S. Lee Park

Project Description and Scope
 Replacement of floating dock and approach with two new floating docks and approaches. Install sidewalk for ADA access. Installation of fencing to minimize grass/shoreline parking. Resurface and restripe parking lot.

Project Justification
 Floating Dock has insufficient rise and fall capabilities for the natural water level fluctuations of the St. John's River. Major cracking in asphalt requiring resurfacing and restriping. No handicap access to pavilion or dock. Major enhancement to park will be additional dock providing greater staging opportunity and an additional platform for fisherman.

Project Phases	Start	Finish
Design	Dec-10	Nov-11
Construction	Feb-12	Jul-13

Funding Strategy
 Boating Improvement Funds/Land and Water Conservation Fund Grant provided through the Florida Department of Environmental Protection with agreement term from March 16, 2011 to March 16, 2014.

Operating Impact
 Concrete from sidewalks will need ongoing maintenance and replacement. Additional floating structure will require more maintenance. The replacement of larger floating structure will require less maintenance in the short term than the existing dock and the aluminum has a longer life expectancy.

Project #: 00234637	District (s): District #5		End Date: October 2013

Project Location

5298 Michigan Avenue Sanford FL 32771

Family: No Family

Project Description and Scope

There are approximately 12 breaches in the levee that if boardwalked will provide much greater access and enjoyment of this property, the beautiful views of the river and all the wildlife that shares the area. This project involves replacing the existing unanchored, 24" wide catwalk located at the entrance to the site with an appx. 500' long by 5' wide boardwalk traversing a wet and otherwise impassible area in route to the levee trail. It also includes the construction of appx. 2,000 feet of boardwalks across the breaches in the existing levee trail in order to create an appx. 6.5 mile loop trail along the St. Johns River and its adjacent swamps and floodplain.

Project Justification

Due to its location along the floodplain of the St. John's River a good majority of the site and the historic levees are inaccessible due to flooding for most of the year. The installation of boardwalks will allow passage across breaks in levees to form a loop trail and allow boaters to access property via a small mooring.

ORANOLE RD AT LAKE RUBY

Project Description and Scope
 THIS PROJECT WILL DETERMINE THE CAUSES OF THE APPARENT SLIPPAGE AND BANK EROSION OF THE NORTH BANK OF LAKE RUBY ADJACENT TO ORANOLE RD, AND PROPOSE ALTERNATIVE SOLUTIONS WITH COST ESTIMATES TO BE USED IN SELECTING AN ALTERNATIVE FOR FINAL DESIGN. ENGINEERING SERVICES WILL BE ACQUIRED FOR CONSTRUCTION DOCUMENTS FOR THE REPAIR OR REPLACEMENT OF TWO EXISTING HEADWALLS AT LAKE RUBY WHICH WILL BE COMPATIBLE WITH THE PROPOSED SOLUTION TO THE EROSION PROBLEM AT THE NORTH BANK.

Project Justification
 POOR DRAINAGE IS LEADING TO LOCALIZED FLOODING AND SEVERE EROSION, WHICH IS DESTROYING A HEADWALL ALONG ORANOLE ROAD. FURTHER EROSION WILL LEAD TO DESTRUCTION OF THE ROAD. PROPER DRAINAGE IS REQUIRED TO PROVIDE A SAFE TRAVEL ROUTE FOR VEHICULAR AND PEDESTRIAN TRAFFIC.

CITY OF WINTER SPRINGS

Project Description and Scope
 CONVERSION OF AN EXISTING SPAN WIRE SIGNAL TO MAST ARMS.

Project Justification
 MAST ARM SIGNALS WITHSTOOD HURRICANE FORCE WINDS BETTER THAN SPAN WIRE TYPE SIGNALS DURING THE THREE HURRICANES OF 2004. THE MAST ARM SIGNAL HAD A LOWER RATIO OF INTERSECTIONS DAMAGED WHICH RESULTED IN THE LOWER REPAIR COSTS. THE LESS EXTENSIVE NATURE OF DAMAGE ALLOWS FOR QUICKER SERVICE RESTORATION THAN THE OLDER SPAN TYPE SIGNALS FOLLOWING AN OUTAGE DUE TO AN EMERGENCY SITUATION.

Funding Strategy
 Partial funding through Cost Sharing with the City of Winter Springs.

Project #: 00282501	District (s): Countywide		End Date: June 2013

Project Location SR 417 @ US 17/92 Interchange	Family: No Family
--	-------------------

Project Description and Scope
 Replacing 4,800 linear feet of galvanized fencing with type B,6' fencing and two double gates, type B,12' both with black vinyl coating. (Seminole Expressway SR 417 at US 17-92). 4,800 LF @ \$20.84 LF = \$100,052. This project is on hold, awaiting the finalization of the 17/92 CRA Master Plan, which is anticipated to be completed during FY 2011/12. Once it is completed, the project will move forward.

Project Justification
 The replacement of the current galvanized fencing with black vinyl will improve the visual appearance of the corridor and will compliment the median beautification and enhanced lighting project currently under construction in Sanford, from Park Avenue to Airport Blvd. This project is in line with the Community Redevelopment Agency Master Plan, as one of the main goals of the plan are visual improvements to the corridor.

Project Phases	Start	Finish
Construction	Apr-12	Jun-13
Project will begin in 2012 based on the Master Plan at which time, design, production and maintenance costs will be determined		

Funding Strategy
 Tax Increment Funding as established in 1997 for the Community Redevelopment District, US 17/92 Corridor.

Operating Impact
 No effect on County operating expenditures as the fencing once replaced, will be maintained by Florida Department of Transportation.

Project Title: Mast Arms Construction Projects	Project Status: On Hold	Start Date: April 2012
Project #: 00282801	District (s): Countywide	End Date: September 2014

Project Location Family: No Family

Various Locations as determined

Project Description and Scope
 Mast Arm construction for US 17/92 Corridor. Locations of the construction projects will be determined in consultation with Traffic Engineering. It is anticipated three projects a year at a cost \$250,000 each to begin in Fiscal Year 2011/2012. The current cable traffic signal infrastructure that traverse the intersection within the US 17/92 corridor will be replaced with mast arms. The mast arms are located on the roadside and branch out over the intersection. The project is on hold pending the development of a list of locations being finalized. It is anticipated that the final list will be developed no later than FY 2011/12.

Project Justification
 Public Infrastructure improvements to the US 17/92 Community Redevelopment Agency (CRA) are reference throughout the US 17/92 CRA Master Plan.

Project Phases	Start	Finish
Construction	Apr-12	Sep-14
A list of locations is being developed with the construction to begin in Fiscal Year 2011/12.		

Funding Strategy
 Tax Increment Funding as established in 1997 for the Community Redevelopment District, US 17/92 CRA Corridor.

Operating Impact
 The current operating budget could see a reduction as the mast arms require less annual maintenance and sustain less damage in a hurricane than the traditional cable traffic signal apparatus. Additionally, when damaged the cost of repairs are a fraction of what it costs to repair the traditional cable traffic signal.

Potable Water

Project Title: Small Meter Replacement Program		Project Status: Active	Start Date: October 2011
Project #: 00022901	District (s): Countywide		End Date: September 2021

Project Location
Countywide

Family: Water Distribution Improvements

Project Description and Scope
Current inventory of small service meters 5/8 through 2 inch is approximately 46,500 meters. Three thousand (3000) of those units are in service areas acquired eight (8) years ago and records indicate that these meters would be the first units to be changed out. With three (3) meter replacement Technicians designated to this program, the planned target replacement meters should average 4,650 annually. As the oldest meters and associated infrastructure are replaced, efficiencies in replacements should increase. It is anticipated the first cycle of total replacements will take approximately 10 years to complete. Subsequent periods will move at a more efficient pace as infrastructure is upgraded

Project Justification
"The primary purpose of the program is to ensure that the cost of water and sewer service is equitable distributed among all customers by accurate meters. A secondary purpose is reduction of current revenue losses that occur because old and worn out meters may under register for long periods without complete stoppage. The program will be ongoing after every meter is changed out at the 10 year cycle. Once the first 10 year cycle is complete the process starts over again."

Project Phases	Start	Finish
Construction	Oct-11	Sep-21

Funding Strategy
In order to complete the first round of meter replacements, an additional \$3,933,000 of funding will be required beginning FY 2017/18.

Operating Impact
Over a ten year period, each quantity of 4,650 meters replaced annually may generate between \$8.7 million and \$10.5 million in additional revenue over current revenue.

Project Title: Lake Hayes Conversion to Repump		Project Status: Active	Start Date: March 2017
Project #: 00056602	District (s): District #1		End Date: April 2018

Project Location Family: Water Plant Improvements

Lake Hayes Water Treatment Plant Site

Project Description and Scope
 Convert existing water treatment plant to storage and repump facility. Components may include yard piping, upgrades to high service pumps, chemical feed systems, backup power, and equipment building.

Project Justification
 This project is necessary to comply with minimum distribution system pressure requirements per Florida Department of Environmental Protection (FDEP) standards, Chapter 62-550, Florida Administrative Code and to extend service life.

Project Phases	Start	Finish
Program management		
Contingency		
Construction	Mar-17	Apr-18

Funding Strategy
 According to the 2012 Revalidation, an additional \$2,180,569 in additional funding after FY 2016/17 will be required in order to complete this project. Project deferred due to modeling of the South East Service Area Water Transmission System has shown that re-pressurization of water from the Lake Hayes Water Treatment Plant will not be needed for at least the next 5 years. The new Master Plan will address the need for this project.

Operating Impact
 Comparable full-time employees and chemical requirements.

Project Title: Lake Monroe Water Treatment Decommision		Project Status: On Hold	Start Date: October 2017
Project #: 00056605	District (s): District #5		End Date: December 2018

Project Location Family: Water Plant Improvements

Lake Monroe Water Treatment Plant Site

Project Description and Scope
Decommissioning of the Lake Monroe Water Treatment Plant after the upgrades to the Markham Regional Water Treatment Plant and an interconnect with the City of Sanford are completed and operational.

Project Justification
This project will provide more efficient use of resources and consolidate operations.

Project Phases	Start	Finish
Construction	Oct-17	Dec-18
Contingency	Oct-17	Dec-18

Funding Strategy
According to the 2012 Revalidation, \$316,935 in funding after FY 2016/17 will be required in order to complete this project. This project was deferred due to available funds being utilized by high priority projects such as major water treatment plant upgrades, projects associated with the water treatment plant upgrades includes transmission lines, projection wells etc., and regulatory-required projects (water quality, etc) and projects already under construction and design.

This project was last funded within the five year CIP funding window in the FY 2010/11 Five Year CIP.

Project #: 00064500	District (s): Countywide		End Date: September 2018

Project Location Family: Water Distribution Improvements

Countywide

Project Description and Scope
 The Water Distribution Upgrades Family of Projects is a series of projects which consists of the rehabilitation of existing Countywide water distribution systems. This is an ongoing program to improve and sustain the reliability of the water piping and valving within systems, including the installation of valves, system interconnections, and line loopings.

Project Justification
 Projects are necessary to restore/improve hydraulic line capacity in conjunction with other defined Capital Improvement Program Distribution projects from the Water & Sewer Utility Master Plan performed every 5 years and is updated to incorporate latest growth projects.

Project Phases	Start	Finish
Program management	Aug-11	Sep-18
Construction	Oct-11	Sep-18

Funding Strategy
 No individual expenditures will be made against this project. Individual family member projects will be established by the Board of County Commissioners and funds will be transferred from this parent project to the newly established projects. This project serves as a holding fund for unplanned water distribution system upgrade needs.

According to the 2012 Revalidation, an additional \$635,000 in additional funding after FY 2016/17 will be required for additional projects within this parent project. This project was deferred due to available funds being utilized by high priority projects such as major water treatment plant upgrades, projects associated with the water treatment plant upgrades includes transmission lines, projection wells etc., and regulatory-required projects (water quality, etc) and projects already under construction and design.

This project was last funded within the five year CIP funding window in the FY 2011/12 Five Year CIP.

Project Title: Bear Lake Water Main Loop		Project Status: Active	Start Date: October 2010
Project #: 00064526	District (s): District #3		End Date: September 2018

Project Location Family: Water Distribution Improvements

Bear Lake Road North of Palm Avenue

Project Description and Scope
 Construction for the extension of a new potable water transmission main between the existing 10" water main and 8" water main to create a hydraulic loop which is the connection of dead end pipes together which results in decreased water age.

Project Justification
 This water main will eliminate two dead ends by creating a loop to improve pressure and flows in the potable water system. This will provide more reliability in maintaining water quality. The longer the water sits (higher water age) the higher potential for water quality degradation.

Project Phases	Start	Finish
Construction	Oct-10	Sep-18
Program management	Oct-10	Sep-16
Contingency	Oct-10	Sep-16

Funding Strategy
 According to the 2012 Revalidation, an additional \$178,051 in additional funding after FY 2016/17 will be required in order to complete this project.

Operating Impact
 This project will present no substantial impact to the operating budget because the hydraulic looping of the system will potentially reduce flushing of the system to maintain water quality in the distribution system. Less flushing requires less labor hours by operations staff.

Project Title: Pump Station Conversion to Digital Radio	Project Status: Adopted	Start Date: October 2012
Project #: 00082914	District (s): Countywide	End Date: September 2015

Project Location Family: Wastewater Pump Station Upgrades

Countywide

Project Description and Scope
 The development and installation of a communication system to enable communication between SCADA system and County lift stations. The County's SCADA system supports the monitoring and control of the county's potable water plants, wastewater plants and reclaimed pump station operations. The County will be migrating from our current analog 800Mhz radio system to a new digital (P25) radio platform by 2014. Environmental Services has over 300 sewer pump stations that utilize the County's radio signal to monitor and transmit data. These pump stations will need to be converted to function with the new digital signal format. This project will provide for new equipment, programming and labor to convert to the new signal.

Project Justification
 The current rebanding effort by Public Safety to the existing communication system will not allow continued use of bandwidth for communication between SCADA system and County lift stations. The County is moving away from an analog system at the end of its life cycle to a digital format that meets current industry standards and provides reliable communications countywide.

Project Title: Tipping Floor Resurfacing		Project Status: Active	Start Date: January 2006
Project #: 00201901	District (s): District #2		End Date: September 2017

Project Location Family: Central Transfer Stations Improvements

Central Transfer Station

Project Description and Scope

Renewal and rehabilitation is needed periodically on the Central Transfer Station tipping floor. The floor has a wear surface composed of an iron-aggregate concrete. As refuse is pushed on the tipping floor, the surface wears out over time. The floor needs to be re-constructed periodically to extend the life of the facility. Smaller patches have been successful in prolonging the need for a major resurfacing; however, the project will be needed soon.

Project Justification

More than 300,000 tons of waste per year moves through the transfer station. The structural concrete is overlain by a sacrificial wear pad that must be refurbished to continue to protect the concrete and embedded rebar. To refurbish the floor, two new term contracts (RFP600992-10/GMG), will be used to install protective patches as needed.

Project Title: Landfill Gas System Expansion		Project Status: Active	Start Date: August 2006
Project #: 00244601	District (s): District #5		End Date: September 2067
Project Location		Family: Landfill Environmental Controls	

Osceola Road Landfill

Project Description and Scope

Design, engineer, permit, and construct an expansion of Landfill Gas Collection System into recently place waste in compliance with Environmental Protection Agency (EPA) Title V regulations and the Landfill's air permit.

Project Justification

Landfill gas system must be expanded in compliance with EPA Title V air regulation. EPA requirements state that a municipal solid waste landfills are required to install and operate active landfill gas extraction systems and control the captured gas. The system must extract the gas from all waste within five years or emplacement (or two years if landfill is inactive). Expanding the landfill gas collection system will continue over the life of the facility.

Project Phases	Start	Finish
Construction	Aug-06	Sep-67

Funding Strategy

This is an ongoing project which receives additional funding of approximately \$250,000 on a yearly basis until the Landfill is closed (for a roughly total of 14.5M). Current projections indicate the landfill will reach completion in 2067. As refurbishment of the system may be required subsequent to closure, a more appropriate project completion date may be 2097. Annual unspent allocations will be used in the subsequent Landfill Gas System Project or returned to fund reserves. It is anticipated these funds will be expended over the life of the project.

Operating Impact

Operating impacts are negligible.

Roadway intersections throughout the County

Project Description and Scope
 Seminole County has approximately 373 signalized intersections. Of these, approximately 312 are equipped with the Traffic Signal Preemption Systems. This project consists of the procurement and installation of additional Traffic Signal Preemption devices that will allow EMS/Fire/Rescue to control traffic signals throughout the County.

Project Justification
 The Traffic Signal Preemption System is designed to help reduce injuries and death to both civilians and firefighters during our agency's response to emergency incidents while reducing response times. Responding to an emergency is a delicate balance between speed and safety. Minutes can often make the difference between life and death. This program also helps to reduce the high cost of civilian and agency vehicle damages that occur during responses to emergency incidents and transporting citizens to hospitals.

Project Phases	Start	Finish
General	Oct-09	Sep-16

Funding Strategy
 An annual appropriation in the amount of \$50,000 through FY2015/16 will fund the project to completion; with an estimated pace of 10-11 devices installed per year, dependent upon the location of intersections.

Operating Impact
 The Public Works Traffic Engineering Program inspects and tests each device twice a year, expending approximately \$45,000 annually for repair and maintenance.

Project Justification
This old courthouse needed to be renovated to comply with the Americans with Disabilities Act and to provide additional space to accommodate citizens and employees involved in civil cases. Addition of courtrooms and processing facilities will make the court process more efficient. Improved security will be addressed with new x-ray machines, metal detectors, and secure parking for judges and court staff. The State has required more mediation services to be provided to the citizens. In order to comply, a larger area is needed to accommodate the additional citizens and employees. The Court Facility building could be used by the law library if modifications are made.

Project Location Fire Station 39 - Yankee Lake	Family: No Family
Project Description and Scope Project development, design, land acquisition and construction of Fire Station 39 in the northwest area of the county, near Yankee Lake. This station will be a three bay facility and will be designed to provide an increase in housing for anticipated growth. [Project managed by Public Works/Construction Management]	
Project Justification Fire Station 39 will enhance the County's ability to provide an appropriate level of fire/rescue services to Yankee Lake area and surrounding areas. This project was last funded within the five year CIP funding window in the FY 2010/11 Five Year CIP.

Operating Impact
This station will require a tower truck, fire engine, rescue unit and ancillary equipment at a cost of approximately \$1.9M. This station will also require 22 new positions for a cost of approximately \$1.5M per year.
Data will be collected and analyzed to determine the feasibility of utilizing existing personnel and equipment from Fire Station # 34 (W SR 46, Paola)

Project Title: Fire Station 23 - Relocation		Project Status: Approved	Start Date: October 2020
Project #: 00274301	District (s): District #1		End Date: September 2022

Project Location

1 Mile west of 4810 Howell Branch Road

Family: No Family

Project Description and Scope

Geographical relocation of Fire Station 23 to maintain a five minute, or less, response time to emergency service calls to the subject area. [Project managed by Public Works/Construction Management]

Project Justification

Fire station 23 is the oldest fire station facility and does not have adequate space to accommodate fire crews and associated apparatus. Current property is not suitable for rebuilding the needed facility. The new design will meet American Disabilities Act (ADA) requirements and provide additional storage space. It will also provide an area for employee wellness equipment to support the Department's health and wellness initiatives. The relocation of the station will help to maintain a five minute, or less, response time to emergency service calls and should adequately handle future growth in the area.

Project Phases	Start	Finish
Right Of Way	Oct-20	Sep-22
Construction	Oct-20	Sep-22

Funding Strategy

This project was last funded within the five year CIP funding window in the FY 2009/10 Five Year CIP.

Operating Impact

This station will utilize Fire Station 23's existing personnel and equipment; so there will be no significant operating impact.

Project Title: UHF/VHF Narrowbanding		Project Status: Adopted	Start Date: June 2011
Project #: 00280502	District (s): Countywide		End Date: June 2013

<u>Project Location</u>	Family: No Family

Project Description and Scope
 Reprogramming of base stations and the replacement of mobile radios and hand held units. The Federal Communications Commission (FCC) has mandated that all Public Safety, and State and Local Government VHF (150 174 MHz) and UHF (421 512 MHz) radio system licensees convert from what has been known as "wide band" (25 KHz) operation to "narrow band" (12.5 KHz or equivalent) operation by January 1, 2013.

Project Justification
 Public Safety Pool licensee's conversion deadline has been changed to January 1, 2013. After this date, all systems must have converted either to 12.5 kHz bandwidth or to a technology that provides one voice channel per 12.5 kHz or operates at a data rate 4800 bps per 6.25 kHz of bandwidth.

Project Title: Radio System - P25 Digital Upgrade		Project Status: Active	Start Date: November 2011
Project #: 00281501	District (s): Countywide		End Date: November 2015

<u>Project Location</u>	Family: Radio System Upgrades
-------------------------	-------------------------------

Countywide

Project Description and Scope
 Migration from our current analog 800Mhz radio system to a digital platform. The 800Mhz radio system used by Seminole County has reached the end of projected life cycle and replacement parts from the existing manufacturer will no longer be available forcing the county to the secondary market for repair items. This is the critical infrastructure component of the countywide communication system. This project will consist of the replacement of numerous base stations at each tower site, controllers, microwave platform, dispatch software to work within the new system.

Project Justification
 The goal is to maintain a reliable and stable communication platform for all first responder agencies and local governments. To move away from an analog system at the end of its life cycle and to a digital format that meets current industry standards and provides reliable communications countywide.

Project Phases	Start	Finish
General	Nov-11	Nov-15
This project will be initiated in 3 phases with the following estimated costs and tentative time-lines:		
Phase 1 - (11/8/2011 - 6/12/2012 : convert 10 Channels, radios and system infrastructure)		
Phase 2 - (11/8/2012 - 4/20/2015: convert remaining 8 Channels and radios & SCADA)		
Phase 3 - (4/21/2015 - 11/27/2015: upgrade Dispatch Consoles)		

Funding Strategy
 At the Board's discretion, a subsequent reimbursement through financing may occur as established and approved via an enacted Funding Reimbursement Resolution.

Operating Impact
 Replacement or reprogramming (flash) of portable and mobile units for all the Seminole County Public Safety Department Radios vehicles and personnel. Upgrade is required to be in compliance with the P-25 radio system

Project Description and Scope
 The Wayfinding project will reduce the number of signs improving the corridor's aesthetic look. It will further create a sense of continuity within the corridor as the signs will be uniform in color and design. The funds for this item are not to exceed the figure of 40 @ \$3,183 = \$127,360. The project is on hold pending the finalization of the 17/92 CRA Master Plan. This is anticipated to be completed FY 2012/13.

Project Justification
 This project achieves two goals as outlined in the Community Redevelopment Agency Master Plan. The first goal is achieved by reducing the number of signs within the corridor. The second goal is achieved by improving the visual appearance of the corridor by installing signs that are of the same design and color.

The EMS Simulation Lab will utilize three rooms at the Emergency Services Training Complex for Emergency Medical Services simulation training and will consist of a classroom, a simulation area, and an observation area. The simulation area will mimic several scenarios typically encountered in the home environment such as a child's crib area, bedroom, and a kitchen area which are typical locations in the home that patient care is provided. In order to have the space necessary for the EMS Simulation Lab, the current Self Contained Breathing Apparatus (SCBA) "Air Pack" maintenance area will need to be relocated within the EMS Training Center Complex. The new "Air Pack" maintenance area will require modifications inclusive of cabinetry, wiring, ceiling installation, plumbing, and ventilation upgrades in order to create a clean environment to service and maintain the equipment. [Project managed by Public Works/Construction Management]

Project Justification

The lab area will provide real time simulation in the medical care of the sick and injured and will provide the opportunity for personnel to receive EMS Training as well as required continuing education credits.

Project Phases	Start	Finish

The costs associated with the relocation and modification of the "Air Pack" maintenance area are not allowable expenses under the EMS Trust Fund Grant and will be fully funded through the Fire Protection Fund.
