CONNECTING TO THE COMMUNITY FOR 40 YEARS

Firefighters, early 1900s

Forest City Fire Station - 1974

First Day of Operation - October 1st, 1974

OUR HISTORY

On November 12, 1973, the Board of County Commissioners passed a fire protection ordinance establishing the Seminole County Fire Control District and creating the Department of Fire Protection. This action was based on the recommendation of a citizens group studying the problem of countywide fire protection problem. Less than 50% of the unincorporated area of the County had an organized fire protection plan and several disastrous fires had recently occurred. Gary E. Kaiser was appointed as Seminole County's first Chief Fire Administrator. On October 1, 1974, the Department of Fire Protection began service to the unincorporated areas of Seminole County. The department consisted of 9 fire stations, 67 personnel, and a budget of \$892,000.

In the mid to late 1970s, the first response agreement with municipal departments was formed with the City of Altamonte Springs and Longwood Fire Departments. The first response agreement allowed for the closest emergency unit to respond, regardless of jurisdiction. Over time, all municipal departments within Seminole County joined the first response agreement. In addition, bordering Orange County and bordering municipal departments also joined first response.

Services expanded over the years to include the Special Hazards and Operations Team that require additional training for team members. Advanced life support, requiring paramedics on units, started in 1984 and by the 1990s, all units had paramedics. In the 1990's, three additional stations were opened to expand the number of stations in the unincorporated area to 12. In 1998, Seminole County began transporting patients to the local hospital which improved care for the citizens by having continuity of care provided by one agency.

In the 2000s, the division's response capabilities continued to expand. As a result of the events on September 11th, 2001, Seminole County EMS/Fire/Rescue became an all hazards department with additional training in how to respond to "acts of terrorism."

The division also continued to grow as municipalities approached Seminole County about merging. The cities of Altamonte Springs and Winter Springs merged, bringing the total number of stations in Seminole County to seventeen (17). Also, a 44,000 square foot Fire-EMS Training Center was opened.

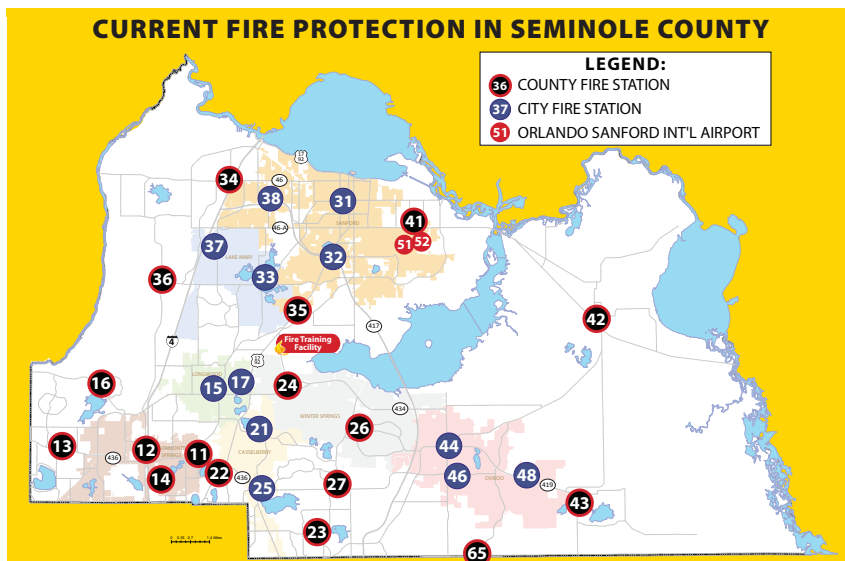

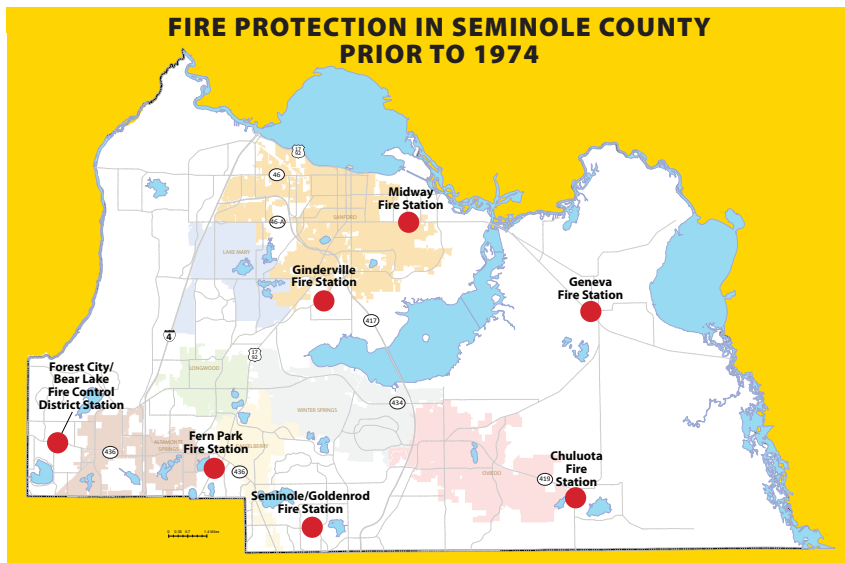

In 2014, Seminole County celebrates its 40th year of responding to the citizens in Seminole County.

Fire/Basic Life Support Service	All Hazards, Fire, Advanced Life Support and Transport

Message from the Chief

To the Citizens and Businesses in Seminole County,

In 2014, Seminole County entered its 40th year of service to Seminole County. Demands on the agency have steadily grown requiring services to expand. The last service expansions occurred with the opening of a fire training center, expansion of special hazard and operations services and the addition of a peak load ambulance to assist with EMS calls during our busiest periods of the week. Additionally, Fire Prevention, under the umbrella of the Building Department, became the responsibility of the Fire Department. These were intentional service changes that aided in SCFD's mission of a 5 Minute Response Time, Trained Personnel, Adequate Resources, Constant Prevention and Go Home Safe. The economic downturn, suffered over several years of 2007 forward, delayed planned service expansions. Equipment and additional fire stations were placed on hold. During this timeframe, no additional taxes were created and no service reductions occurred.

As 2015 unfolds, a great deal of change will encompass the agency. There will be a third municipal merge of service with the City of Casselberry on October 1st, 2015. This will bring SCFD up to a total 19 stations and 427 personnel. A consultant report is anticipated to recommend an organizational model change for the department that will streamline a reporting of the Fire Department directly to the County Manager's office. Union negotiations will work toward securing a three year contract that will aid in both the reduction of overtime cost and improve firefighter pay. The agency will take delivery of an unsurpassed number of new vehicles to include 8 engines, 6 rescues and 1 tower. New endeavors will include the addition of providing our own fire investigative services that will assist in both our safety and prevention efforts. A fire cadet program will be implemented that will allow youth to explore the fire service as a career. I have truly enjoyed my time as Fire Chief with Seminole County and I will retire in 2015.

Our service demands are at a peak and our responses are those commonly associated with large urban areas. Seminole County Fire Department is made up of men and women that are dedicated, passionate professionals who are committed to delivering fire and EMS services with skills that are industry hallmarks. It takes an experienced and dedicated staff to assure that firefighters have what they need, including resources, training and guidance. One of the most difficult challenges of a Fire Chief of a large organization is to assure that firefighters feel appreciated. All of the accolades we receive are communicated to them, regular recognition is done through citations and awards and job well done conveyances. Many times I'm asked by our citizens how they can help our efforts and my answer is always the same. Express your appreciation for the job they willingly do. In today's world of choices, there are many who can help but not all are truly willing. Firefighters are willing, every minute of every day, even when they aren't officially on duty.

My utmost respect and thanks to them and to those who support our public servancy.

In Service,

Leeanna Mims, Fire Chief

Seminole County EMS/Fire/Rescue Medical Director

Did you know? 65% of our alarms are to provide care to the community for medical emergencies!

Your emergency....

You or your loved one is experiencing a heart attack. Heart damage is beginning to occur. (Time and treatment is critical) You call 911. The average response time (2014) in Seminole County is 5 minutes and 50 seconds. Paramedics and EMTs arrive at your home. (Time and treatment is critical) Your community fire station's paramedics and EMT's have the resources, training and skills to begin providing advanced life support care and medications while preparing to transport to the hospital. (Time and treatment is critical) The patient is transported and transferred to the emergency room at the hospital. Patient is administered additional medical intervention at the hospital. Patient is discharged from the hospital. A life is saved by your community fire station and healthcare system. That is why we are here to serve you and make a difference.

How does Seminole County EMS/Fire/Rescue prepare for your emergency?

Seminole County EMS/Fire/Rescue is a critical component of emergency medical services and the

healthcare system. In preparing to respond to your medical emergency, a series of actions have to occur. A requirement by the Department of Health –Emergency Medical Services Office is to have a licensed EMS provider to treat and transport patients. In addition, it is a requirement to have an established Medical Director.

Seminole County EMS/Fire/Rescue is a licensed Emergency Medical Services (EMS) provider under the Department of Health-Emergency Medical Services Office that gives the authority.

The Medical Director is a contracted position and provides medical direction to all EMS providers in Seminole County.

Medical Director

The lead Medical Director, Dr. Todd Husty and his team Mark Wechsler, PA and Dr. Stan Haimes provide medical direction. All paramedics and emergency medical technicians (EMTs) are required to work under a licensed Medical Director. The Medical Director is an integral component of emergency medical services as it ensures the appropriate delivery of emergency medical care to our community.

The Medical Director has ultimate authority over all clinical and patient care.

Dr. Husty and his team establish written protocols that provide paramedics and EMTs standard operating guidelines to ensure the patient care activities performed by EMS providers are appropriate, within their scope of practice, and within operational expectations. Multiple meetings per month are held with Dr. Husty or a member of his team to review cases and continue to enhance care to the community.

March 27, 2015

Seminole County Residents:

I was asked to write some comments about Seminole County EMS medical direction. I was told that I would have the opportunity to brag about what the medical directors do. Instead, I need to take the time to brag about how the system works, exceptionally, and our small but important part of that system.

The county and the municipalities along with their Fire Chiefs have chosen and promote EMS medical direction that includes having small, face-to-face meetings with all fire department personnel. We conduct 6 to 8 meetings per month which means we see everyone, once a quarter. The meetings are part quality assurance, part training and part open discussion. Through the review of actual EMS calls, we find questions, confusions and problems with our protocols. Everyone in the system looks at these as opportunities to improve. Our findings become part of the next quarter's medical director meetings.

Although what I said in the above paragraph may not look like much, in practice it is phenomenal. We, all of us, are constantly and actively improving the system. Our protocols constantly expand. The training for those new protocols is part of the process. Seminole County EMS/Fire/Rescue is recognized statewide as having some of the most advanced protocols that provide an exceptionally high level of care before our patients reach the hospital.

But our advanced protocols would not work if it were not for the EMTs and Paramedics that are dedicated to learning more, taking on more responsibility and providing the highest level of pre-hospital care. Yes, the medical direction team of myself, Mark Wechsler, PA and Dr. Stan Haimes is important. Protocols are important. But the secret sauce is dedicated personnel. They are the ones that really make this work. Seminole County is fortunate, very fortunate, to have EMTs and Paramedics that are always willing to step it up a notch. The medical direction team is fortunate to be able to work with such a talented and dedicated group. It makes our jobs much easier and very rewarding.

Sincerely,

Todd M Husty, DO FACEP

3040 S Tuskawilla Rd, Oviedo, FL 32765 407-679-6794 (office) 407-679-3554 (fax)

Community Outreach

Community Outreach helps the community by informing and providing safety education!

The Community Outreach Office is responsible for providing and coordinating information, fire/life safety, as well as coordinating community involvement. All members of the division carry out the mission of Community Outreach.

Community Information about your fire department is available through social media, website, and news releases. **Media Relations** is also an important part of delivering information to you through our local news. The media has access to a Public Information Officer 24/7 to provide important emergency related information that could affect your commute or neighborhood.

Community Fire and Life Safety Education is taught to you, by all members of our division, through speaking engagements and hands on training. The division also served as the lead organization for **Safe Kids Seminole County** whose mission is to prevent unintentional injuries to children 14 and under. To request a speaker, please visit our website and request a program. **Community Outreach sends members to your community events and brings the community into the fire stations.**

Major Accomplishments:

Media Relations/Social Media

Launched Twitter Site – SCFD PIO Media

637 Media inquiries

101,288 community members were reached through:

123 Station tours

“Thank you for assisting us with bringing Santa through our community. They did an awesome job hitting every cul de sac and even stopping on the way if they saw residents trying to take pictures of Santa. Thank you for all you and your staff do every year in assisting our community in celebrating the holidays.”

- Egrets Landing Subdivision

Administration/Finance

Administration/Finance helps the Community by being fiscally responsible with your tax dollars and ensuring our firefighters and emergency medical services personnel are ready to respond to your emergency!

Operating a fire department is similar to operating a household, but on a much larger scale. *Costs include housing personnel, transportation to your emergencies and all the additional resources needed to run a household. In addition, payroll costs for firefighter/paramedics and firefighter/EMTs are an operating expense for your community fire station, so that our emergency services personnel are in a constant state of readiness to respond to your emergency. Should your local first responders be unfortunate and get hurt while fighting fire or be exposed to infectious disease, just like a household, we have to make certain they are scheduled for the appropriate Dr.'s appointments with any follow up treatment that is necessary.*

The Office of Administration and Finance coordinates these activities by preparing the budget to: operate the fire stations, pay personnel, and oversee annual expenditures to ensure tax payers dollars are spent appropriately.

Here is the average cost of a fire station with emergency vehicles along with the cost to operate annually.

Fire Station Budget:

Land	\$2 million
Construction.....	\$2.4 million
Equipment	\$1.4 million
Annual Operating Costs.....	\$1 million

Tower Truck - \$1.2 million
Equipment - \$70,000

In 2014, a total of 107 firefighter/paramedics and firefighter/EMTs were on duty.

2014 Budget Administration & Operations

Personnel Services	\$37,892,038
Operating Expenditures.....	\$3,060,326
Grants & Aids	\$42,433
Internal Charges	\$4,987,963
Capital Equipment.....	\$6,942,624
Total:	\$52,925,384

2014 Fire Prevention

Personnel Services	\$570,249
Operating Expenditures.....	\$27,922
Internal Charges	\$15,552
Total:	\$613,723

2014 Fire-EMS Training Center

Operating Expenditures.....	\$318,147
Capital Equipment	\$25,820
Total:	\$434,967

Grants

FY 13 SHSGP	\$13,200
FY14 SHSGP	\$17,778
Safe Kids	\$11,455

Engine with equipment - \$487,000
Equipment - \$60,000

Rescue with equipment - \$235,000
Equipment - \$60,000

Squad 2 - \$800,000
Equipment - \$425,000

Planning & Resource Management

Preparing to Respond to Your Emergencies

In order to respond to your emergency, fire stations have to be built and current ones have to be maintained. Fire engines, rescues and other specialty equipment have to be purchased, replaced and maintained. Fire stations have to be stocked with resources to run a household such as furniture, kitchen appliances and supplies. Fire engines need the necessary equipment to fight fire and extrication equipment to cut motorists out of crashed vehicles. Rescues need life saving medications, airway supplies to provide oxygen, backboards and stretchers to move and transport patients. SCFD has a 44,000 square foot Fire-EMS Training Center that requires maintenance the same as a fire station.

2014 Fire Station Renovations/ Projects/Maintenance:

- Stations 11 & 41 – kitchen renovation
- Station 16 – partial kitchen renovation

Maintenance Costs - 17 stations/ Fire-EMS Training Center:

1,417 work orders for \$273,896.25

Proactive Projects:

Fire Station #43 Tiling	\$3,496.25
Fire Training Center Exterior Painting ...	\$124,895.50
Fire Station #42 Exterior Painting.....	\$5,181.20
Fire Station #42 Tiling	\$4,607.50
Fire Station #16 Exterior Painting.....	\$11,708.00
Fire Station # 41 Window Replacements ...	\$3,795.00

Total of ProActive Projects: \$153,683.45

Supplying 17 fire stations and the Fire-EMS training center, which is essentially 18 households, with a minimum of 5 people living in it 24 hours a day and 7 days a week, requires a logistical warehouse. The inventory remains between \$300,000 - \$350,000 at all times to keep your community fire station ready to respond to your emergency.

PROFESSIONAL STANDARDS AND TRAINING

is housed at the Fire-EMS Training Center in Longwood. The firefighters, EMTs and paramedics that respond to your emergencies spend 78,944 hours a year training to be ready to respond to emergencies in your community. Mandatory continuing education units (CEU's) are held as required at this facility. This includes certifications for CPR, ACLS (Advanced Cardio Vascular Life Support, PHTLS (Pre hospital Trauma Life Support), as well as, Live Fire Training.

The Professional Standards/ Training Section has the responsibility of hiring firefighter/paramedics and firefighter/EMTs to respond to your emergency. First we have to test, conduct a hiring process and

interview. This can take several weeks to process. After being hired, new personnel go through a 6 week training orientation prior to being assigned to a fire station. In addition, new personal protective equipment has to be purchased to protect them while responding to all the types of hazardous situations they encounter. Additionally, all the current personnel continually go through training and their personal protective equipment has to be replaced to keep them safe. This section also prepares employees to go through promotional processes that are conducted bi-annually to promote them to the next rank to become leaders such as Lieutenant in charge of a fire station or a Chief Officer in charge of several fire stations.

2014 Significant Accomplishments:

Testing, Hiring, Preparing and Protecting new Firefighters/Paramedics/EMTs

Testing - Candidate Physical Ability Testing (CPAT -Revenue Generating)

- 271 candidates took the Fire Team test and 544 attempted the CPAT. \$60,000 in revenue.
- 146 applicants applied of which 25 were hired.
- Preparing 6 week orientation - \$94,000
- Protecting - Personal protective equipment for new candidates - \$7,760 ea., \$194,000 total.

Preparing Our Future Leaders

- 50 hour Blue Card Training Certification - \$30,000

Planning & Resource Management (Continued)

- 40 Hour Officer's Academy
- Lieutenants Promotional Process - 41 processed, 20 made the list. This list will serve to fill vacancies for two years. \$26,000.

Fire-EMS Training Center

- State of the art emergency medical services simulation lab (Sim Lab) 30-person classroom, an EMS skills lab, and a simulation lab. \$350,000

Gas Fed Live Fire Props

- Vehicle and building fires - this grant-funded \$89,000 project brought the Fire Training Center to the next level by giving personnel the experience of fighting real fire.

What do the firefighters do when they aren't responding to emergency calls? Train, train, train!

In 2014, your Seminole County firefighters completed 78,944 hours of training! Training includes all facets of emergency response such as emergency medicine, fire attack strategies and tactics, hazardous materials awareness and response, technical rescue, personnel development, and physical fitness.

Two six (6) week orientation classes were held in 2014.

Officer Academy

All of the equipment on our emergency vehicles has to be maintained and in good working order to ensure it is operational when responding to your emergency. There are many maintenance standards to follow that are established by: OSHA, Department of Health, the National Fire Protection Agency, and many other agencies that establish rules and laws that require maintenance/replacement.

NEW RESCUES AND NEW BATTALION VEHICLES

- 2014 Emergency Vehicle Purchases - 4 Battalion Vehicles (3 Rescues)

Annual Fleet Maintenance Costs

A battalion vehicle is equipped with the tools necessary for a Chief Officer to command an emergency incident in your community. It is their mobile office. A Battalion Chief is in charge of all on-scene and incoming emergency vehicles and personnel. Safety and accountability of the citizens and emergency personnel is the first priority! The new command vehicles have 2 radios, one mounted in the front and one mounted in the back, wired and wireless headsets, and a computer that allows the office in charge to monitor all incoming and outgoing radio transmission, provide direction to the units on scene, track the on-scene resources, and monitor the dispatch computer for additional responding units.

Planning & Resource Management (Continued)

2014 Emergency Medical Services/Equipment Replacement

In addition to 4 new rescues, the current rescues and equipment have to continually be re-stocked and maintained. As part of an ongoing replacement program, stretchers and Life-Paks have to be replaced every five years, depending on use. Five rescue stretchers were replaced at a cost of \$75,000. Additionally, 6 Life-Pack monitors were replaced at a total cost of \$210,000.

FIRE PREVENTION

Another key component in Planning and Resource Management is Fire Prevention. Fire Codes require both new construction and current commercial buildings to be inspected to maintain a safe environment for the community members who occupy a place of business or visit a local venue. This keeps our residents and responding emergency personnel safe by providing and maintaining safe sprinkler systems, and unobstructed paths to get out of a local restaurant or shopping venue in case of a fire or other emergency.

Large Projects in 2014

- BJs Restaurant and Brewhouse - Oviedo
- Exchange at Savannah Park
- Fresh Market – Lake Mary & Winter Springs
- Grand Oaks at Heathrow - Sanford
- High Reach - Sanford
- Integra Village - Sanford
- Jesup's Landing – Winter Springs
- Lake Forest Medical Center - Sanford
- Starlight Baptist – Winter Springs

Plans Review/Inspections

- **Site Plan Reviews** – 443 – 15% decrease previous year – 18% increase in 4 year average
- **Building Plan Reviews** – 772 – No increase over previous year – 4% increase in 4 year average
- **Fire Protection System Plan Reviews** 551 – 10% decrease over previous year – 11% increase in 4 year average
- **New Construction Inspections** – 1554 – 4% increase over previous year – 25% increase in 4 year average
- **Ongoing Compliance Inspections** 2166 – 7% increase over previous year – 19% increase in 4 year average
- **False Alarm Inspections** – 220 – 41% increase over previous year – 88% increase in 4 year average

Accomplishments

- Developed and Initiated Site Permits
- Developed and Initiated Code Violation Timelines
- Developed and Initiated School Access Inspections

Operations

Seminole County EMS/ Fire/Rescue Operations are the ones at your local fire station responding to your emergencies.

Your emergency. An emergency occurs in your community. A fire, gas leak, vehicle crash, medical emergency, hazardous materials leak, or act of terrorism, are just to name a few. 9-1-1 is called. Your community fire station(s) is dispatched to respond to your emergency. Average response time to arrive on scene is 5:50. Time is important. Units arrive on scene and handle the emergency.

Seminole County EMS/Fire/Rescue is an all hazards department and firefighter/paramedics and firefighter/EMTs that respond are cross trained to handle a multitude of emergencies. In addition, specialty units receive additional training to handle more complex emergencies in your neighborhoods and on your roadways.

In 2014, SCFD responded to 34,463 alarms. 17,424 of the alarms were medical emergencies. SCFD saved over 45 million dollars in property!

3 Fire Fatalities

Seminole County, FL responded to 3 fatality fires, each with 1 fatality.

- On January 4, 2014, Fire Rescue responded to a 2 story apartment building on St. Johns Circle in Fern Park, Casselberry.
- Crews responded to large 2 story home on

Brantley Estates, in Altamonte Springs. With reports of a possible victim when they arrived on scene, firefighters searched the home with active fire and heavy black smoke.

- Seminole County Fire responded to Brooks Lane in unincorporated Oviedo, for a 2 Alarm log cabin style house fire in the early morning hours on 12/23/2014.

Arson Fires

In 2014, Central Florida experienced a series of arson fires and the City of Sanford and Seminole County experienced 10 of the 28 suspicious arson-related fires.

As a result of the multiple fires, Seminole County EMS/Fire/Rescue, Seminole County Sheriff's Office, Sanford Police and Fire Department established an arson task force to review the fires in Seminole County. Due to the large number of fires being reported with similar patterns in Central Florida, Seminole Coun-

ty EMS/Fire/Rescue contacted the Central Florida Intelligence Exchange (CFIX), which established a nine agency arson task force.

Arson Task Force

Due to the cooperative multi agency approach, a subject of interest was identified and arrested on a pre-existing warrant, where additional charges are pending. These actions help to reduce fears in the community, in both Seminole County and surrounding counties. The arson task force consisted of the following:

- State Fire Marshal's Office
- Bureau of Alcohol, Tobacco, Firearms and Explosives (ATF)
- Sanford Police Department
- Orlando Police Department
- Orlando Fire Department - Arson
- Daytona Beach Police Department
- Fusion Centers – CFIX/NEFFC/CIAC/GISAC
- Florida Department of Law Enforcement
- Seminole County Sheriff's Office
- Seminole County Fire Department
- Representatives from District and State Prosecutors Office

Operations (Continued)

Did you know?

All fire engines and rescue units are staffed with paramedics! If the rescue unit is helping another community member or transporting a patient, the fire engine in your area can help with your medical emergency the same as a rescue. The only difference is they cannot transport you to the hospital.

Urban/Wildland

- 7 Woods Trucks
- 3 All Terrain Vehicles
- 2 Boats
- Bambi Bucket (available through SCSO Helicopter)
- Bike Team
- 2 Military 6x6 Vehicles
- 3 Tankers (Water Tenders) – 1 off road capability

Burn Team

Seminole County EMS/Fire/Rescue provides a community service through the Prescribed Burn Team. This team conducts burns on county lands throughout the year to help reduce the fuel load in the event of a wildfire. In 2014, the team conducted 13 prescribed burns on a total of 397 acres.

Trails Mapping Project

Last year signs were installed to cover 5,200 acres providing hikers/bikers the ability to pinpoint their location in an emergency.

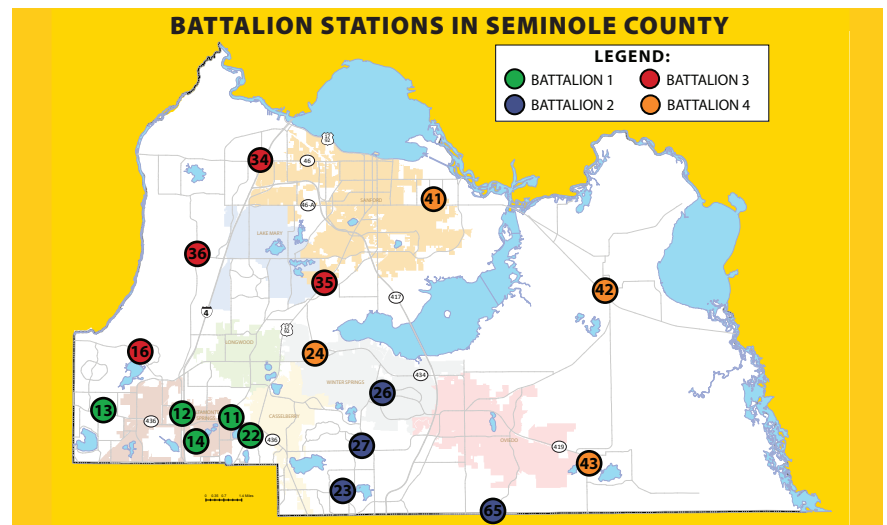

Operations

Your neighborhood fire station is the vital link in connecting to the community. Citizens may visit the fire station during business hours from 8:00 a.m. to 8:00 p.m. Your neighborhood stations are grouped into Battalions. A Battalion Chief responds to your emergencies and serves as the “Incident Commander” or supervisor and makes critical decisions to protect life and property. An Incident Commander makes multiple decisions within the first few minutes of an emergency.

Battalions consist of the following:

- **B1 – Stations:** 11, 12, 13, 14, 22 (Altamonte Springs, Fern Park)
- **B2 – Stations:** 23, 26, 27, 65 (Winter Springs, Casselberry, UCF (Orange County))
- **B3 - Stations:** 16, 34, 35, 36 (Sanford/5 Points, Wekiva, Heathrow)
- **B4 – Stations:** 24, 41, 42, 43 (Chuluota, Geneva, Sanford/Midway, Winter Springs)

Customer Feedback

I would like to thank the EMT's from Station 12 Alpha Shift for doing their part in saving my life when they responded to a 911 call due to severe chest pain. They were efficient, very professional and kept me at ease. The final outcome was a stent placed in my 99% blocked LAD.

Customer Feedback

On Tuesday, September 16th my daughter called 911 for medical services for me. The responding team was so professional and extremely courteous, consulting with me and explaining what they were doing. I ultimately had emergency surgery that night for a strangulated abdominal hernia. You have an excellent team and I wish to thank each and every one of you from the bottom of my heart for making an extremely difficult time a little bit more tolerable.

- Barbara McHone

Customer Feedback

On 9-11-14, R28 ran a second call on a patient. The first call was a legitimate refusal. Everything was ok except for the fact he had fallen rather unexplainably for the second time. The Firefighter/Paramedic made the decision to talk the patient into going to the hospital, where it was determined he had an active brain bleed. Receiving medical care was paramount in his recovery and limiting the severity of his medical condition. Persistence and compassion paid off.

Customer Feedback

I would like to thank St. 27 for their kind and compassionate care they gave my Aunt when transporting her to the hospital. She was suffering from myeloma and had fractures in her back as I'm sure others we didn't know about. The crew was very gentle and patient with her, making her as comfortable as possible. My family will be forever grateful for everything the crew did for her.

Customer Feedback

Thanks to your Fire & Rescue team, I was tended to within 10 minutes of our 911 call for a suspected heart attack based on early symptoms. The competence of your team is so reassuring. To have the competence of rescue services at the door in 10 minutes is just plain overwhelming. May God bless you all and, from the bottom of our hearts, thank you, thank you, thank you.

- Dave Halloran

Seminole County EMS/Fire/Rescue and Orange County Fire Rescue have a joint station at the Orange/Seminole County border. The station sits on the edge of the University of Central Florida across from the Knights football stadium. The two agencies have a first response agreement allowing them to respond seamlessly into each other's jurisdiction.
