

Help Protect Central Florida's Water Resources!

Join the

Why is Your Help Needed?

Many of Central Florida's waterways have become polluted with trash and debris. This, along with stormwater runoff, has created a negative impact on our water resources. Removal of trash is one of many ways to help reduce pollution. We can also help conserve urban wildlife habitats with the removal of nuisance plants. This, along with education, will help maintain the balance of our natural areas. For more information about water resources in Seminole County, visit www.seminole.wateratlas.org or www.seminolecountyfl.gov.

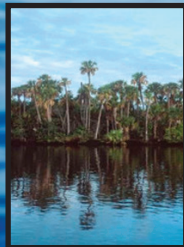

The Adopt-A-River Program is a program that facilitates the monitoring, clean up and enhancement of stream/river segments in Seminole County, and is open to individuals and organizations interested in helping the environment.

Ten Simple Things You Can Do to Help Local Rivers or Streams:

1. Join the Seminole Education, Restoration and Volunteer (SERV) program.
2. Get to know your local rivers.
3. Attend a Florida Yards and Neighborhoods Workshop.
4. Coordinate a cleanup in your area.
5. Learn more about water resources.
6. Protect riverside greenways.
7. Maintain your septic system.
8. Place stormdrain markers in your neighborhood.
9. Conserve water at home.
10. Reduce use of pesticides and fertilizers in your landscape.

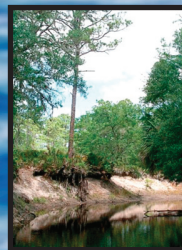

A Few of the Local Rivers...

St. Johns River

Wekiva River

Econlockhatchee River

Little Wekiva River

... That You Can Adopt
