# Seminole County Greenways, Trails & Bikeways Conceptual Master Plan

## Goals

Provide for greenways, trails and bikeways as a vital element to maintain and improve the quality of future development and community revitalization efforts throughout Seminole County. A coordinated program will result in:

- Increased multi-use recreational facilities
- Linkages between our neighborhoods, schools, parks, and activity centers
- Alternative transportation opportunities
- Enhanced quality of life for residents and business.

## Objectives

- Plan for greenways, trails and bikeways as part of the necessary infrastructure of development and community revitalization
- Provide viable alternatives to move around Seminole County outside of a personal automobile and mass transit
- Provide increased recreational opportunities for walking, hiking, biking and equestrian users
- Revitalize or enhance neighborhoods with linkages to nearby parks, schools and activity centers
- Provide on-road bike lanes/routes for commuting and touring cyclists
- Connect large Natural Lands, parks and activity centers throughout the County and region.
- Protect greenway corridors which will preserve and connect important natural resources.
- Encourage private industry to integrate greenways, trails and bikeways into development planning.

## Map Assumptions

Graphic depicts proposed projects identified by Task Force and public input. Each corridor will require further analysis to determine feasibility. Local links will be determined through Neighborhood Linkage Program.

# Seminole Wekiva Trail Markham Rd Extension

# *Seminole Wekiva Trail Markham Rd Extension*

- The project extended the existing trail one half mile and added sidewalk connections to residents.
- The trail extension was completed in June 2011.

# Lake Mary Blvd at International Pkwy Underpass

# *Lake Mary Blvd at International Pkwy Underpass*

- The project eliminated two at grade pedestrian crossings at the busy intersection with Lake Mary Blvd.
- The project was open to the public in December 2011.

# *SR 426 and Red Bug Lake Rd Overpass*

# SR 426 and Red Bug Lake Rd Overpass

- The County received 4.2 million in ARRA funding for this project.
- The project should be open to the public in April 2012.

# SR 46 Gateway Sidewalk Project

# SR 46 Gateway Sidewalk Project

- The County received 3.1 million in grant funds for the construction of this project.
- The project should be under construction in early 2013.

# Riverwalk Phase 2

# Riverwalk Phase 2

# Riverwalk Phase 2

- The total funding for the project is now at about 7 million.
- Sanford is anticipating a construction start date of September 2012.

# Cross Seminole Trail Missing Link along SR 419

# Cross Seminole Trail Missing Link along SR 419

- The County recently received approval from CSX and the signed Preliminary Engineering Agreement.
- The project should be under construction in early 2013.

# Seminole Wekiva Trail Phase 4

# *Seminole Wekiva Trail Phase 4*

- The County received a total of 2 million in grant funds for this project through MetroPlan.
- The project should be under construction in Spring 2013.

# Cross Seminole Trail Downtown Oviedo Connection

# Cross Seminole Trail Downtown Oviedo Connection

- The County recently received approval from FDOT to install an RRFB crossing at SR 434.
- The project should be under construction in late 2012.
