MESSAGE From the Fire Chief

To The Citizens and Businesses of Seminole County:

Seminole County Fire Department (SCFD) celebrated its 45th anniversary in October of 2019. From its inception in 1974, SCFD has grown to an all hazards fire department that provides emergency

services for unincorporated Seminole County and the cities of Altamonte Springs, Casselberry and Winter Springs, serving a population of over 335,000.

Station 11 that serves Altamonte Springs is in the planning stage for replacement and a new Station 39 is in the planning stage and will service the western portion of the county along State Road 46. In the spring of 2019, Station 29 held an open house for the community in celebration of its opening for service in late 2018.

Over 126,497 training hours were conducted at our Fire Training Center in 2019 to ensure our firefighters were well versed in the numerous functions of their jobs when faced with natural disasters, fires and emergency medical services. Training and safety initiatives included the Tactical Incident Command Simulator and the Cancer Risk Reduction initiative. SCFD's Fire Training Center delivered National Fire Academy, state and local level courses to firefighters throughout the state and county.

The Emergency Communications Center transitioned to a new state-of-the art computer aided dispatch (CAD) system. This CAD/Mobile system was a 2 year project and was placed in service in 2019. The new CAD also allowed for the implementation of PulsePoint, a life-saving application in which CPR trained citizens can receive alerts and deliver assistance for residents that experience sudden cardiac arrest in a public location. SCFD's Emergency Communications Center staff handled over 69,000 calls for service in 2019. These calls resulted in over 21,000 EMS transports and over \$148,281,988 million dollars of property saved on structure fire responses.

SCFD's Community Outreach Office taught 2,259 residents in Hands-Only CPR and the use of an automated external defibrillator. SCFD also installed 403 smoke alarms in homes in need and participated in numerous other educational activities.

In closing, going into 2020, SCFD remains committed to preserving the trust of our citizens by ensuring appropriate training, reliable and timely service and quality care. I would like to thank our staff for a job well done this year; and, on behalf of our entire staff, I would like to also thank our County Manager and Board of County Commissioners for their continued support of the Fire Department. Finally, as an agency, we would like to thank the citizens and businesses of Seminole County for their ongoing support. The alliance of community working together to assist each other in times of need is to be commended and is appreciated by our entire staff.

Mark W. Oakes Fire Chief

Todd M. Husty, D.O., FACEP Office of the Medical Director City of Lake Mary, City of Longwood, Orlando/Sanford Airport, City of Oviedo, City of Sanford, County of Seminole, Seminole County SWAT, City of Winter Springs SWAT

May 12, 2020

Greetings from the Seminole County EMS Medical Directors,

Every year we have the opportunity to relate to you the activities of the medical directors, Seminole County EMS and emphasize the importance of how well the system works because of the support of the County commission and its constituents. Please see the paragraphs below for that information. What we have not talked about in the past is how the EMS medical directors get involved in a variety of other medically related problems in the community simply by virtue of our position but also because of our interest in healthcare. For the last several years we have been intimately involved with the problems and solutions in the opioid epidemic. We have worked with law enforcement, the health department and even the County commission itself in looking for solutions. As always is true in medicine, the best solution is prevention, but we are adding education and treatment. We also have been on the forefront of utilizing specially trained paramedic, known as Community Paramedics to work with our hospitals in providing follow-up care in patient's homes. This is to try to assure that patients with chronic medical problems stay as healthy as possible and hopefully stay out of the hospital. They have been so successful that we are adding more community paramedics. The medical director's would like to acknowledge the local hospitals and Florida Blue for their financial backing of these projects.

The county and the municipalities along with their Fire Chiefs have chosen and promote EMS medical direction that includes having small, face-to-face meetings with all fire department personnel. We conduct 6 to 8 meetings per month which means we see everyone, once a quarter. The meetings are part quality assurance, part training and part open discussion. Through the review of actual EMS calls, we find questions, confusions and problems with our protocols. Everyone in the system looks at these as opportunities to improve. Our findings become part of the next quarter's medical director meetings.

Although what I said in the above paragraph may not look like much, in practice it is phenomenal. We, all of us, are constantly and actively improving the system. Our protocols constantly expand. The training for those new protocols is part of the process. Seminole County EMS/Fire/Rescue is recognized statewide as having some of the most advanced protocols that provide an exceptionally high level of care before our patients reach the hospital.

But our advanced protocols would not work if it were not for the EMTs and Paramedics that are dedicated to learning more, taking on more responsibility and providing the highest level of pre-hospital care. Yes, the medical direction team of John Murray, MD, Mark Wechsler, PA, Stan Haimes, MD and myself is important. Protocols are important. But the secret sauce is dedicated personnel. They are the ones that really make this work. Seminole County is fortunate, very fortunate, to have EMTs and Paramedics that are always willing to step it up a notch. The medical direction team is fortunate to be able to work with such a talented and dedicated group. It makes our jobs much easier and very rewarding.

Sincerely

Todd M Husty, DO

process, ultimately resulting in saving life-critical seconds for residents and visitors.

Implementation of this new system allows SCFD to utilize a single application, providing countywide situational awareness, maximum operational effectiveness through real-time communications and the ability to make dynamic decisions regarding the allocation and deployment of resources. System activities include: 911 calls, dispatching fire/EMS to incidents, command and control of resources, including geographical tracking of apparatus, alerts and warnings regarding hazardous situations and system-wide notifications of serious incidents. Under the direction of the Seminole County Board of County Commissioners, project research and development began in July 2017. The State of Florida appropriated \$2 million dollars towards the overall system, which allowed the County to effectively and efficiently manage the project in less time. PulsePoint was also included in the new CAD upgrade.

This Division manages:

Emergency Communications

Emergency Communications

Major Project: Computer Aided Dispatch

A new era of public safety operations commenced in Seminole County this year as the Seminole County Fire Department (SCFD) successfully transitioned to a new, state-of-the-art computer-aided dispatch system, CAD/Mobile. This \$3.2 million dollar system is the principal application used to connect all relevant public technology programs utilized within Seminole County, including: 9-1-1, radio, mapping, mobile data computers, and records management.

SCFD can now precisely measure response times and identify operational efficiencies related to each step of the dispatch

 Centralized First Response Emergency Dispatching (All Fire Departments within Seminole County)

New Fire Stations

Station I I Relocation

Station 39

SCFD procured five separate parcels off of 1st St. and Orange Blvd. in Sanford for a future 4 bay fire station. This station will house an engine, tower/ladder, rescue, tanker and other equipment and is scheduled to go out for design in 2020.

Capital Project Manangement

In coordination with the City of Altamonte Springs, a new Seminole County Fire Station 11 is planned for construction near the Sun Rail Station on Ronald Reagan Blvd. and S.R. 436.

Pulse Point Implemented - On October 22, 2019 SCFD launched a life-saving application in which CPR trained individuals can receive alerts for patients that are experiencing sudden cardiac arrests in a public location. The location-aware application will alert users in the vicinity of the need for CPR simultaneous with the dispatch of advanced medical care. The application also directs these potential rescuers to the exact location of the closest AED. It is proven that early intervention CPR gives the patient the best chance of survival.

Smoke Alarms - 403 were installed through the SCFD and American Red Cross partnership in the communities of Unincorporated Goldsboro, Oakland Hills and Palm Valley.
