Notes: Required travel to community service sites, hearing sites, law enforcement agencies and the Department of Juvenile Justice. Also, participation in training, workshops and community programs is vital. Staff participates in Juvenile Justice Council, Council of Volunteer Coordinator meetings and Safe and Drug Free Schools meetings are also required.

Diversion Officers are required to conduct field, school and home visits to ensure that clients are meeting PAY Program expectations.

One staff member to attend annual Florida Association of Community (FACC) Conference for 3 nights - lodging, meals, mileage - \$300

Reimbursement for local travel - \$450

| Notes: Costs associated to the annual Unidirectional Flushing Program (UDF) to improve water quality and distribution reliability. Conducting a comprehensive and systematic water line flushing effort will protect and enhance the quality and safety of our drinking water. The goal of this program is to ensure water quality is maintained at its optimal level and to properly maintain the County's water distribution lines. Flushing is a process by which water is moved through a water pipe at a high velocity so that a scouring action is created. This process will also enable improved locations of valves and locations of lines in our water distribution system. |           |                   |                    |                   |                   |                   |                   |                   |

|--------------------------------|--|--|--|---------|---------|---------|---------|---------|

Notes: This line item reflects credit card (CC) acceptance fees @ \$2.00 per transaction, and a contingency for utility billing system programming/support services. These costs are offset by a \$2.00 bank fee per transaction which is passed on to the customer.

FY 07-08 Actual Amount: \$111,606

FY 08-09 Actual Amount: \$ 91,909

FY 09-10 Budget Amount: \$120,000

FY 10-11 Proposed Budget: \$110,000

The majority of this budget line item is incurred on credit cards, fees that vary in direct proportion to demand/use. The County/Department has no direct influence over this activity. Based on this activity and in actual costs it is anticipated that the cost will be reduced by \$10,000 in FY 10-11

| Notes: Water Conservation evaluations are offered to our customers to increase the efficiency of irrigation systems. Training classes are offered for citizens and customers on efficient use of water and maintenance of the educational demonstration garden. Rain sensors are provided as required by Florida Statute 373.62. |         |                   |                    |                   |                   |                   |                   |                   |

| Travel and Per Diem for Training |  |  |  | 1,000 | 1,000 | 1,000 | 1,000 | 1,000 |
|----------------------------------|--|--|--|-------|-------|-------|-------|-------|

Notes: Travel expenses and per diem for required training classes that cannot be brought to our training facility. This expense includes Homeland Security conferences, backflow seminars, and water operational seminars. The Division tries to bring the trainers to our facilities to minimize the expenses.

FY 07-08 Actual Amount: \$ 48

FY 08-09 Actual Amount: \$ 337

FY 09-10 Budget Amount: \$2,500

FY 10-11 Proposed Budget: \$1,000

The number of seminars that are held outside the central Florida area could affect the cost for travel per diem.

|-------------------------|--|--|--|-------|-------|-------|-------|-------|

Notes: Funding is needed to lease a Fujitsu Fi-5750C Flatbed Swivel Scanner for 11" X 17" documents.

FY 07-08 Actual Amount: \$0  
FY 08-09 Actual Amount: \$0  
FY 09-10 Budget Amount: \$2,800  
FY 10-11 Proposed Budget: \$2,800

The requested scanner will be used for the PEI Division's (Capital Improvements Program) CIP project files document control. There is a large volume of project documents being generated by the Five Year CIP which requires a high speed scanner to ensure accurate and up to date project files. The budget for this account line remains unchanged to meet projected needs.

| This line item was increased to be in alignment with actual costs based on executed contract for FY09-10.                                                                                                                                                                                                                                 |         |                   |                    |                   |                   |                   |                   |                   |
| Inventory Reduction moved to 087801                                                                                                                                                                                                                                                                                                       |         |                   |                    | -800,000          | -800,000          | -800,000          | -800,000          | -800,000          |
| Notes: Inventory moved to the Water & Sewer Operations Program to track costs associated with the Inventory. This will allow the utilities to maintain tracking in the JD Edwards System since the programming of the Work Order System in JDE allows only the Business Unit of 087801 to be entered into the system for all work orders. |         |                   |                    |                   |                   |                   |                   |                   |
| Meter Boxes                                                                                                                                                                                                                                                                                                                               |         |                   |                    | 15,000            | 15,000            | 15,000            | 15,000            | 15,000            |
| Notes: Costs associated with meter boxes that provide an underground vault for protection of the meters, repairs and replacements.                                                                                                                                                                                                        |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Inventory moved from the Water & Wastewater Programs to track costs associated with the Inventory. This will allow the utilities to maintain tracking in the JD Edwards System since the programming of the Work Order System in JDE allows only the Business Unit of 087801 to be entered into the system for all work orders. |         |                   |                    |                   |                   |                   |                   |                   |

| Deposit Interest |  |  | 200,000 | 200,000 | 200,000 | 200,000 | 200,000 | 200,000 |
|------------------|--|--|---------|---------|---------|---------|---------|---------|

Notes: Customer accounts receive interest annually consistent with BCC policy. The rate equals our average earning rates and is provided by County Finance. Accruals for estimated loss on doubtful accounts are made annually at year end.

FY 07-08 Actual Amount: \$ 6,603

FY 08-09 Actual Amount: \$15,964

FY 09-10 Budget Amount: \$ 6,000

FY 10-11 Proposed Budget: \$16,000

The annual estimate of this expense is made after the year closes by comparing our charged receivables older than 90 days with the remainder of the balances owed the County. Current economic conditions indicate 2011 likely will be comparable. Interest expenses on utility accounts will be about \$16,000.

| Notes: Inventory moved to the Water & Sewer Operations Program to track costs associated with the Inventory. This will allow the utilities to maintain tracking in the JD Edwards System since the programming of the Work Order System in JDE allows only the Business Unit of 087801 to be entered into the system for all work orders. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Inventory moved to the Water & Sewer Operations Program to track costs associated with the Inventory. This will allow the utilities to maintain tracking in the JD Edwards System since the programming of the Work Order System in JDE allows only the Business Unit of 087801 to be entered into the system for all work orders.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Inventory moved from the Water & Wastewater Programs to track costs associated with the Inventory. This will allow the utilities to maintain tracking in the JD Edwards System since the programming of the Work Order System in JDE allows only the Business Unit of 087801 to be entered into the system for all work orders.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Costs associated with educational supplies that promote conservation that are given out at homeowner association meetings, landscaping classes, Master Gardener's presentations, other civic organizations and churches as well as community festivals and educational events. The proposed amount also covers the cost of drought tolerant plants and gardening supplies for the water conservation gardens. The types of items purchased are usable items for our customers such as low flow bathroom faucet aerators, kitchen faucet aerator (the aerators cut water flow up to 50%), toilet tummy's (used to displace water in the toilet for better efficiency-this product saves hundreds of gallons per person per year). Also, low flow showerheads (help with both water & energy you use to heat it, these showerheads have a full force shower while you save water & cut your electric bill), shower timers (parents love these for helping their children to take faster showers), gauges, flappers, leak detection tablets (when a toilet leaks water it can easily waste hundreds of gallons of water each day), water conservation kits (that include several of the above items together with literature). |         |                   |                    |                   |                   |                   |                   |                   |
| FY 07-08 Actual Amount:                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |         | \$12,030          |                    |                   |                   |                   |                   |                   |

|------------------------------|-----------|--|--|-------|---|---|---|---|
| Camera Equipment Replacement | ES-Rep EC |  |  | 8,200 | 0 | 0 | 0 | 0 |
|------------------------------|-----------|--|--|-------|---|---|---|---|

Notes: Equipment used to camera the wastewater laterals to identify what the problem is and who is responsible for the repair. Replacement of these 3 pieces of equipment \$2,733 each allows the County to provide the customer a record of the issue and support to our Risk Management Office on claims by customers.

The Division is going to reuse the cables and camera's, but need to replace the monitor, DVD recorder, batttery and charger.

Equipment allows for a structured approach to the repair with a safer environment to staff. This process identifies the exact location and issue prior to excavation. If not replaced this would not allow for expeditious repairs effecting customers and would require additional overtime to complete the repair.

These repairs are necessary and falls under the FDEP Regulations Chapter 62-604.

|------------------------|--|--|--|--------|--------|--------|--------|--------|

Notes: Costs associated to gas chlorine cylinders which are needed for disinfection of water as required by Florida Statute 620-555.350.

FY 07-08 Actual Amount: \$73,852

FY 08-09 Actual Amount: \$62,540

FY 09-10 Budget Amount: \$60,000

FY 10-11 Proposed Budget: \$90,000

This line item was increased due to the contracted costs is anticipated to increase during FY 09-10.

**530525 Operating Supplies - Chemicals**

**40100 Water And Sewer Operating Fund**

**08782 Water Management Program**

**087806 530525 Operating Supplies - Chemicals**

Notes: Costs associated with sodium hydroxide, which is needed for pH adjustments and corrosion control required by Florida Statute 62.555.350.

FY 07-08 Actual Amount: \$ 96,278  
FY 08-09 Actual Amount: \$162,401  
FY 09-10 Budget Amount: \$ 77,000  
FY 10-11 Proposed Budget: \$143,000

This account line was increased based on an increase in contracted costs.

|                     |         |         |         |         |         |

**08783 Wastewater Management Program**

**087810 530525 Operating Supplies - Chemicals**

|              |        |        |        |        |        |
|--------------|--------|--------|--------|--------|--------|
| Peroxidation | 46,607 | 46,607 | 46,607 | 46,607 | 46,607 |
|--------------|--------|--------|--------|--------|--------|

Notes: Costs associated with service, chemicals and handling of peroxidation (Hydrogen Peroxide) required for odor control at liftstations.

FY 07-08 Actual Amount: \$36,960  
FY 08-09 Actual Amount: \$46,607  
FY 09-10 Budget Amount: \$90,000  
FY 10-11 Proposed Budget: \$46,607

Budget line item moved from Operating Supplies to Chemicals. Previous years expenses paid from Utilities line and Operating Supplies.

|         |         |         |         |         |         |
|---------|---------|---------|---------|---------|---------|
| Polymer | 100,000 | 100,000 | 100,000 | 100,000 | 100,000 |
|---------|---------|---------|---------|---------|---------|

Notes: Costs associated to polymer, which is needed for sludge processing.

FY 07-08 Actual Amount: \$ 40,000  
FY 08-09 Actual Amount: \$ 75,352  
FY 09-10 Budget Amount: \$100,000  
FY 10-11 Proposed Budget: \$100,000

Since the sludge dewatering system at Yankee Lake is new, polymer dosage is unknown at this time.

|                     |         |         |         |         |         |
|---------------------|---------|---------|---------|---------|---------|
| Sodium Hypochlorite | 300,750 | 300,750 | 300,750 | 300,750 | 300,750 |
|---------------------|---------|---------|---------|---------|---------|

Notes: Costs associated with sodium hypochlorite which is needed for disinfection of water as per Florida Statutes 62.600.440, 62-610.460 and 62-610.463.

FY 07-08 Actual Amount: \$172,736  
FY 08-09 Actual Amount: \$233,593  
FY 09-10 Budget Amount: \$373,750  
FY 10-11 Proposed Budget: \$300,750

Increases in flows require more treatment and during construction flow-pacing feed of the chemical has to be suspended, requiring more chemical.

| Notes: As needed for maintenance of the leachate collection system. The system is required by Florida Administrative Code Chapter 62-701 and Florida Department of Environmental Protection permit. System performance is routinely monitored by County and Florida Department of Environmental Protection through a hydraulic monitoring system and ground and surface water quality monitoring. |         |                   |                    |                   |                   |                   |                   |                   |
