| Notes: The reverse calling system requires the acquisition of addressing information from the telephone companies each year. This is a shared cost between the Seminole County Public Safety Department and the Seminole County Sheriff's Office. The information is loaded into the reverse calling system to be used during times of emergencies including, but not limited to, hazardous materials events, shelter in place orders, evacuations, curfews, and life-threatening environmental issues. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Reverse 9-1-1 -- is the system that allows emergency communications personnel to notify citizens of dangers in their community with a electronic voice or personal message. Telephones are activated inside the person's homes and messages are presented to help the family make critical decisions during events, such as, hazardous materials events, shelter in place, evacuations, etc. The system is also used to notify specific groups (i.e. special needs registrants) of the opening of shelters and safety precautions during emergencies. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: This line is used for maintenance to replace the antennas, feed lines, jumper lines, connectors and standoffs for our 800MHz, VHF and UHF shared radio systems that are located at ten tower sites. This ledger will allow 5 sites to be completed this fiscal year (Five Points, Altamonte Springs, Sable Point, Courthouse and Dike Road). This is offset by the \$12.50 surcharge program. Estimated budget \$20K                                                               |         |                   |                    |                   |                   |                   |                   |                   |
| Maintenance/Stock/Parts/Repair - County Wide Programs                                                                                                                                                                                                                                                                                                                                                                                                                                     |         |                   |                    | 120,000           | 120,000           | 120,000           | 120,000           | 120,000           |
| Notes: This line is used for repair and maintenance support for day to day operations for two departments which are the Department of Central Services/Operations Division and Department of Public Safety/Telecommunications Division. Because of the demands produced from these departments, our inventory requires constant monitoring and managing of all transactions and expenditures generated from the stockroom to ensure fiscal and budget compliance. Estimated budget \$120K |         |                   |                    |                   |                   |                   |                   |                   |
| Motorola Maintenance                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |         |                   |                    | 415,000           | 415,000           | 415,000           | 415,000           | 415,000           |
| Notes: This line is used in support of the County-wide 800 MHz Shared Radio System maintenance contract with Motorola Inc. for the day to day functionality and operations to include repair, restore or rectify troubles at the ten 911 tower sites and 911 communication center. This line is offset by the \$12.50 surcharge program and the Law Enforcement Radio Communications Inter-local programs. Estimated budget \$415K                                                        |         |                   |                    |                   |                   |                   |                   |                   |
| Radio Communication                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |         |                   |                    | 200,000           | 200,000           | 200,000           | 200,000           | 200,000           |
| Notes: This line is used for end user support of inventory parts, repairs and maintenance support for county-wide shared radio system program. It is offset by the \$12.50 surcharge program and the maintenance inter-local program for radio communications. This inventory requires constant monitoring and managing of all transactions and expenditures generated from the stockroom to ensure fiscal and budget compliance. | Notes: Dialogic Communication (Reverse 9-1-1) is the system that allows emergency communications personnel to notify citizens of dangers in their community with a electronic voice or personal message. Telephones are activated inside the person's homes and messages are presented to help the family make critical decisions during events, such as, hazardous materials events, shelter in place, evacuations, etc. The system is also used to notify specific groups (i.e. special needs registrants) of the opening of shelters and safety precautions during emergencies. \$2,579 |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: The EMTEL (Emergency Notification System) is a voice and electronic emergency warning system used during disasters including tornadoes, major hazardous materials incidents, and Emergency Operations Center activations. The system notifies the public of major emergencies or the threat of disaster through electronic communication (e-mail, pager, cellular, PDA) and voice (standard telephone lines, voice-over IP, and cellular) System maintenance is contracted to EMTEL, Inc.                                                                                           |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Note: Annual Maintenance cost for 911 recording system and archive server for all 5 PSAPs. This system records all incoming 911 calls and allows for immediate play back of calls to the 911 Operator to insure all information was received correctly. This provides 24x7 maintenance and repair for all servers and recorders.                                                                                                                                                                                                                                                    |         |                   |                    |                   |                   |                   |                   |                   |

Notes: Printing - External printing budget was reduced by one half for FY07/08 and FY08/09. However, the reduction was too much and additional funding is required. Expenditure for printed material the Copy Center cannot produce. Examples include: pet license envelopes, numbered accounting forms, numbered citation forms.

| Notes: Approximately 29% of our monthly Probation Cost of Supervision (COS), Pretrial Diversion COS, Pretrial Diversion Community Service Buyout, Community Service Insurance and Immobilization payments are made by Visa/MasterCard. A review of transaction fees over the last three years shows about a 20% increase in monthly credit card transaction fees since 2007.                                                                 |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: This fund is for the 1/4ly exposures report submitted for the supplemental medical insurance policy – Accidental Death & Dismemberment per Administrative order 94-28-S. This expenditure is budget neutral due to fees collected by sentenced offenders on Probation, Pretrial Diversion, PAY/Juvenile Diversion and also for non-sentenced clients such as those wanting to pay off traffic fines.                                  |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Food - Animal Services participates in the Shelter Nutrition Partnership program sponsored by Hill's Pet Nutrition Sales, Inc. Hill's provides food for sheltered animals and charges only 35 cents per pound for associated shipping and handling costs. Hill's also provides food, at no cost whatsoever, to customers who adopt animals. Animals are maintained at the shelter an average of 7 days. Project expenditure of \$15,400 for 44,000 pounds of food purchased through Hill's. Project an additional \$1,000 expenditure to purchase food for livestock and exotics. |  |  |        |        |        |        |        |        |

| Notes: Pet Microchip Implant Program - Resolution 2005R-14 establishes a pet microchip program. This program provides permanent identification to facilitate lost pet recovery. All adopted animals receive a microchip implant. The owners of impounded animals have the option to purchase a microchip implant. This expenditure is offset by collecting a \$5 fee from the customer at the time of the adoption or when an impounded animal is redeemed. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Annual Maintenance cost for 911 GIS Quality Control Software. This software allows the 911 Admin Office to cross reference the 911 MSAG, 911 TELCO Database, County GIS data and other GIS data to ensure uniformity and that all information is correct. The annual maintenance is for updates and help desk assistance from vendor.                                                                                                                                                                             |         |                   |                    |                   |                   |                   |                   |                   |

| The program provides a uniform and standard calltaking protocol for the calltakers to follow during the processing of a fire call. The program will then permit a different response from fire responders based on the answers provided during the calltaking phase. The program is a nationally recognized system and will fill the gap we currently have in the fire area of calltaking. We will be provided software for ten positions, quality assurance software and training/certification for all dispatch staff. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Due to an increase in the age of residents of Seminole County and the increase in registration of special needs clients, it will be necessary for EM/Health Dept. to purchase additional equipment to take care of our most vulnerable population. The equipment that will be purchased includes hospital shelter beds, medical boxes and supplies, wheelchairs, AED, and various other shelter supplies. The Health Department is sharing a portion of the costs. The estimate in our budget line is Seminole County's half of the project |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Due to directives from the Department of Homeland Security, Florida Division of Emergency Management and Presidential Directive 8, all first response and support agencies will need to have persons trained in the National Incident Management System and Incident Command System. FY09/10 and FY10/11 have specific training requirements including the Intermediate Incident Command System (G-300) and Advanced Incident Command System (G-400).                                                             |         |                   |                    |                   |                   |                   |                   |                   |

| The program provides a uniform and standard calltaking protocol for the calltakers to follow during the processing of a fire call. The program will then permit a different response from fire responders based on the answers provided during the calltaking phase. The program is a nationally recognized system and will fill the gap we currently have in the fire area of calltaking. We will be provided software for ten positions, quality assurance software and training/certification for all dispatch staff. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Contracted staff assistant scientists necessary as extension of staff to conduct required monitoring, maintenance, investigations, sampling, GIS mapping, etc. to meet regulatory compliance (NPDES, TMDL, ERP). Utilized to chieve NPDES permit compliance requirements including Part V.A & B & attached monitoring plan; Part II.A.7 a & c. Utilized to collect monthly lake level data utilized for Emergency Management & TMDL Pollutant Load Analysis; BMAP for Lake Jesup Basin, Chap. 5.1 Monitoring & Evaluation                                                                                                                                                        |         |                   |                    |                   |                   |                   |                   |                   |
| This includes the increase in contracted/negotiated rates for 2 full time positions, a 4WD truck and a boat, as well as the associated costs for maintenance and fuel for each. Total hours of positions have been decreased to accommodate for the increase in costs to the maximum extent possible and still meet the minimum regulatory requirements. FY07/08 annual expenditures, prior to rate increases, were approximately \$80,000. Annual budget for contracted staff has been increased to accommodate for additional water quality monitoring requested by and funded by 4 cities (~\$24,000) to meet the Lake Jesup BMAP regulatory obligations in a cost effective manner. |         |                   |                    |                   |                   |                   |                   |                   |
| TMDL Macroinvert                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |         |                   |                    | 5,000             | 5,000             | 5,000             | 5,000             | 5,000             |
| Notes: Verification/reference library required by DEP standard operating procedures and provide more accurate impairment info ultimately providing cost savings. Req'd to meet NPDES Permit FLS000038 Part V & Atatched monitoring plan; BMAP for Lake Jesup Basin, Chap 5.1, Monitoring & Evaluation                                                                                                                                                                                                                                                                                                                                                                                   |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: As construction of Major Projects is completed, the files are scanned. It is anticipated that Airport Blvd, CR 46A and C-15 project files will be scanned by an outside vendor. Cost per contract is approximately \$300 per drawer and a total of 6 full filing cabinets need to be scanned. Using an outside vendor for this purpose is more cost effective than using County Employees.                                                                                                       |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: SW - This conference provides continuing education required for herbicide applicator licensing. Two rooms for three nights @ \$125/night = \$750. Three days of meals for three people @ \$50/day = \$450.                                                                                  |         |                   |                    |                   |                   |                   |                   |                   |
| All three herbicide licenses run concurrently, so continuing education is also done concurrently.                                                                                                                                                                                                  |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Field Operations trucks have transponders so they may utilize toll roads to minimize travel time to and from jobsites. Cost per transponder is based on an average number of trips. (5 transponders @ \$83 = \$417)                                                                         |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Field operations trucks have transponders so they may utilize toll roads to minimize travel time to and from jobsites and during hauling operations. Cost per transponder based on average # trips. 15 transponders @ \$83.50 = \$1,252 |         |                   |                    |                   |                   |                   |                   |                   |

Notes: Provides annual support services and vendor released updates for software modules which comprise the Field Operations Asset Maintenance System used by Roads-Stormwater and Traffic Engineering divisions of Public Works. This will provide for orderly continuation of annual support services for this system which continues to be in active use by Public Works operations and provides essential information. This system allows the department to review and determine the efficiency and effectiveness of its service delivery and assist in managing the assets of our operations.

Per contract, each year there is a 5% increase.

FY 2011 - \$43,824

FY 2012 - \$45,796

Currently the contract only goes to FY 2012.

| Notes: Maintenance to the double wide trailers/buildings not covered by Facilities. Our manufactured outbuildings need modifications/repairs due to reorganization and consolidation that are not part of normal facility maintenance. An additional \$5,000 was moved from Org. 077442 due to the Concrete truck/Silo being moved to this org from District Operations. Also covers any special equipment repairs that arise not covered by Fleet. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: The cabling within a mast arm intersection will deteriorate over time, even though the mast arms themselves may have a much longer service life. This item is to have a contractor re-cable approximately 9 of our 200 mast arm intersections per year.                                                                                                                                                      |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Pellets are made of the same material as briquets. They are cheaper to use than briquets and can be distributed in more types of wetlands than briquets can. This material lasts 30 days and is a better value than other cheaper materials, which only lasts 24 hours. This cost has gone up because Seminole County is now controlling the wetlands within the Cities. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: Appraisal software for researching Non-MLS Sale. Price has been significantly reduced. WAS \$1320. This software allows searching records using variable search criteria. The data collected can be manipulated in many ways including importing to excel files. In the excel file formulas are used to extract price per square foot or price per acre etc. It is an excellent software program allowing the research of very specific data. |         |                   |                    |                   |                   |                   |                   |                   |

| Notes: AutoCAD is a construction plan preparation software for in-house minor design projects (projects less than \$50k in construction) for sidewalk and very minor improvement. This purchase is for one network license to be shared by every current holder of the ACAD software (six active licenses in engineering). By the acquisition of this network, all of these current users don't have to purchase a yearly upgrade. |         |                   |                    |                   |                   |                   |                   |                   |

| Survey Licenses (1) \$255<br>Relates directly to the mapping roadway and drainage features both in the field and office for department inventories and maintenance purposes. The division utilizes field GPS mapping equipment to "map" and geodetically locate surface and subsurface features within the public right of ways and easements using specialized positioning and GIS software for locating and displaying the position of such features.                                    |         |                   |                    |                   |                   |                   |                   |                   |

Notes: The Certified Residential Appraiser for ROW is required to do real estate appraisals for acquisition purposes for Seminole County. This requires an Appraiser License. Membership in the Orlando Regionals Realtor Association (ORRA) and Multiple Listing Service (MLS) is required to access the records found in MLS. The MLS has very informative data as part of the listing including days on the market, listing agent, broker, details concerning the property listed including sold date, broker information, seller information (contacts that were part of the sale and would have information about the sale which is required).

In a publicaition dated Spring 2007 from the Department of Business & Profession Regulation (DBPR), the Florida Real Estate Appraisal Board (FREAB) and Alert by Francois K. Gregoire, Chair, FREAB, in part reads:

"Appraisers must closely examine the history of the property in the MLS to not only meet their obligations under Uniform Standards for Uniform Standards of Professional Practice (USPAP), rules 1 through 5, but also to comply with Florida Law..."

Appraiser License \$255

MLS \$312

Surveying and Mapping

Society and PSM License

Renewal

Notes: The Florida Surveying and Mapping Society membership is directly job related to the Survey job positions and provides a forum for members to receive and/or participate in the latest technology and innovations in their area of expertise. This is a source where they can receive the latest information on new technologies and innovations that are available in the industry which is beneficial for programs and projects. This membership offers discounts to members for Continuing Education Credits (CEU's) that are required to maintain a Survey license.

(FSMS memberships for 2 members at \$255 = \$510 and License renewal for 2 members at \$255 each = \$510)

|-------------------------|--|--|--|-----|-----|-----|-----|-----|

Notes: The World of Asphalt is a trade seminar held in Orlando in which the attendee will share his learning with the rest of the Engineering Construction management staff. Engineering construction management deals with asphalt paving on all of its capital projects. This seminar will demonstrate new techniques and application methods for asphalt paving that would be beneficial to the performance and applications of asphalt on County Projects.
